TWO-DAY VISIT-British Prime Minister Edward Heath greeted by the lord mayor, Councillor William Christie, at Belfast city hall yesterday. Security men in rear.

Urges Isolation of Extremists

Heath in Belfast, Pleads for Entente

ain's Prime Minister Edward Heath today urged Northern Ire-land's Protestants and Catholics to make a new start by showing extremists of both sides clearly "that the gun and the bomb offer no solution and are totally re-

He warned Protestant extremists that any attempt to set up an independent Northern Ireland would only "bring about a bleed-bath" and force Britain to cut off all financial aid to the province. This amounts, he said, to £200 million a year.

In a luncheon speech to leaders of business, trade unions, local government and the church, Mr. Heath said: "At is not enough to sit behind closed doors and pray that the gunmen will pass you by. Violence will only stop when those who are against violence act to defeat it."

"Terrorists must be given no help or encouragement," he add-"Money must be refused to them. And they must be denied any safe haven within the community from which to operate. Crucial Stage

The speech disclosed the approach the British leader plans to take in private talks with political and religious leaders over the next two days, his first such consultations here since he took office in June. 1970. The prime minister made it clear that preparations for a new form of local government in the province, to replace direct rule from London, were now reaching a crucial

phase. "We must bring home to all the people that in Northern Ire-

BELFAST, Nov. 16 (AP).—Brit- land today, compromise and cooperation does not mean the betrayal of sincerely held aims and ideals," he stated. Any political settlement, Mr.

Heath emphasized, "must enable the majority and minority communities . . . to take full part in government in the interests of the whole province." His remarks left little doubt

that Britain will insist on broader representation for Catholics in any new system of local government after direct rule from London ends early next year. There was little evidence, however, that concessions were im-

mediately likely either from the Protestant-based Unionist party, which ran the province for 50, years until London imposed direct rule last March, or from opposition groups of Catholics.

Key questions likely to remain unsolved in Mr. Heath's talks here were the shape of the new local government, how it is to Belfast and the relationship of of a factory.

the province to the overwhelm-ingly Catholic Irish Republic to the south.

Government sources said it was important for Mr. Heath to be seen here taking soundings and seeking local agreement, but that proposals for any settlement would probably be worked out in London

Mr. Heath underscored his distaste for both Protestant and Catholic extremists by refusing to meet their leaders here. But their presence was felt nonetheless. The eve of his visit was marred by bomb and bullet attacks that wounded a soldier and :killed a Catholic civilian, the 630th life lost to Ulster violence in the last

Final Round of Vietnam Talks Is Expected in Paris Shortly

Le Duc Tho, Kissinger Awaited

By Don Cook

PARIS, Nov. 16 .- The final round of the Vietnam cease-fire

Le Duc Tho, the Hanoi Politburo representative at the secret talks, will arrive in Paris tomorrow morning from Peking and Moscow, Henry A. Kissinger will be coming in from Washington either a few hours ahead or not far behind.

The expectation here is that the two men may sit down together tomorrow afternoon in the first of a series of meetings, which Mr. Kissinger has said need last "three or four days at the most" to complete an agreement.

A key section to be cleared up in this final round of negotiations, it was learned, concerns the site, the chairmanship, and the functions of the "international conference," which is to convene within 30 days after the ceasefire takes effect, and take up a "supervisory role," to reinforce

the peace. Contrary to earlier expectations, Paris now appears to be ruled out as the site of the international conference—to a large degree because of objections by South Vietnam, supported by the United States, that French influence in a supervisory role in the peace-keeping would "tilt" too heavily in Gaullist fashion in the direction of the North Viet-

Chairmanship Role If the international conference were to be established in Paris, then the French would not only be the hosts but presumably also

hold the chairmanship. The United States has therefore pressed that the conference should be held on "neutral ground" that is, not in the capital of any of its participants. According to accepted by the North Vietnamese, but they in turn appear to be ruling out any return to Geneva as the site, for reasons of their own memories of the 1954 Geneva conference, which they have always regarded as a failure

from their standpoint. The participants in the new international conference will be the five permanent members of the United Nations Security Council—the United States, the Soviet Union, China, France and Britain-plus the UN secretarygeneral and the three protagonists in the Vietnam war, North and South Vietnam and the Viet Cong Provisional Revolutionary Government. This makes nine participants in all, and rules out a conference site either in Vietnam or in one of the Big Five

Among the cities which are being considered for the conference (Continued on Page 2, Col. 4)

Retally Gives Trudeau

2-Seat Commons Edge WHITEY, Ontario, Nov. 16 (AP).—Prime Minister Pierre Elliott Trudeau's Liberal party has a two-seat edge over the Progessive Conservatives in the Canadian House of Commons following recount of the votes in a southeast Ontario district. Recounts in other disputed districts

are still to come. The lineup in Commons now is Liberals 109, Conservatives 107, New Democrats 31. Social Credit 15 and independents 2. The Liberals still are 24 seats short of a majority and must have the support of the New Democrats to

Fighting Steps Up Near DMZ

U.S. Jets Maintain Blitz on North

SAIGON, Nov. 16 (AP) .- U.S. lanes kept up intensive bombing of North Vietnamese supply lines today, devastating an enemy truck park. Fighting on the northern front was reported the heaviest in two months.

Air Force and Seventh Fleet fighter-bombers flew more than 270 strikes and B-52s made 30 missions against enemy targets in the southern panhandle of North Vietnam yesterday and to-day, the U.S. command reported. Pilots reported knocking out 68 trucks loaded with ammunition

almost half of them in a vehicle park off the main highway near Quanq Khe, 65 miles northwest of the Demilitarized Zone. The trucks were concealed under thick jungle cover, but were

photographed by unmanned U.S. reconnaissance planes, Air Force Phantom jets hit the trucks before they could move out under cover of darkness.

Pilots reported their bombs triggered off numerous explosions and All the raids were below the 20th Parallel in accordance with a U.S. pledge not to bomb north

of the line during the current peace talks. This keeps Hanoi the capital, and Haiphong, the main port, off limits to American The raids raised to 1,560 the re-

ported number of tactical air strikes mounted by U.S. planes against North Vietnam since last Thursday, when the blitz was intensified.

The attacks are in response to what U.S. officials call a substantial enemy supply push into South Vietnam aimed at beating any cease-fire deadline.

B-52s dumped tons of bombs south of the Barthelemy Pass, hitting supply convoys on their way to the Plaine des Jarres in northern Laos, where North Viet-namese troops have been attack-

The U.S. command also reported American fighter-bombers and B-52s flew dozens of missions in support of South Vietnamese troops in battle around the pro-vincial capital of Quang Tri on the northern front.

Government marines and airborne battalions killed 59 enemy troops at a cost of five dead and 41 wounded, the Salgon command reported. The bodies of 25 North Vietnamese soldiers slain by air strikes were found.

A five-hour fight yesterday was the heaviest combat on the northern front since last Sept. 16, when Quang Tri was recaptured from enemy forces who had occupied it for nearly five months. Troop Movement

Enemy gunners poured hundreds of shells into government positions to cover what the Saigon command reported was considerable movement in the area. A military spokesman, Col. Le Trung Hlen, said the enemy's purpose was presently unclear but he denied knowledge of any North Vietnamese move to pull

back across the Demilitarized Zone it would be my assumption that it was a normal rotation of units," he told newsmen. Government infantrymen

miles to the northeast today, the reports said. South Vietnamese casualties were listed as two rangers killed and nine wounder The U.S. command said today that nine Americans were killed in action in Indochina last week including one who dled in Laos, and 26 injured. Five of the casualties were men who died in an accident aboard the carrier Midway on Oct. 24. A command spokesman said there was no in-

Laird Asserts U.S Will Drop Role of 'Cop' Protecting Allies

Secretary of Defense Melvin R. Laird declared today that in the immediate future the United States "will expect other nations to provide more cops on the beat their own neighborhoods." Mr. Laird said the policies of

President Nixon as he approaches his second term call for "America to supplement rather than try to supplant the capabilities ments and nations."

Asked whether the Nixon policy might mean reductions in foreign gid. Mr. Laird replied. "Yes I see an increased burden-sharing on the part of the nation's allies." He singled out Japan for men-tion, saying it spends only seventenths of 1 percent of its gross national product on defense and

"We do have an arrangement one way." In his sneech Mr. Laird said he

is confident that President Nixon's foreign-policy initiatives "will indeed lead to a peace that will last," in Vietnam and elsewhere He said Mr. Nixon's approach to national security represented a fundamental departure from past policies and attitudes. Those who fashioned our foreign policy in the past decade perceived the role of the United

States as the ultimate guarantor of peace in the world—in effect, the problem-solver for all of the world's security ills," he said. But under the Nixo. Doctrine of helping America's allies help themselves, he said, this country "will no longer try to play police-man to the world."

U.S. Asks Swiss to Approach Cubans on Anti-Hijack Policy

By Fred Farris

-The United States today announced its willingness to undertake indirect negotiations with Cuba in an effort to end airline hijackings.

State Department spokesman Charles W. Bray told newsmen that the U.S. wished to inform Cuba that it was prepared to take any action that would effectively halt hijackings.

Secretary of State William P. Rogers met this afternoon with Swiss Ambassador Felix Schynder and asked him to convey the American government's views to the Cuban government. Switzerland serves as U.S. diplomatic intermediary with Cuba in the absence of formal relations.

Today's State Deportment declaration followed a Cuban statement yesterday calling for a "broad agreement" with the United States that applied to both hijackers of American aircraft and Cubans who seize Cuban ships and planes to flee to the United States.

However, the White House cautioned against speculation that an anti-hijack agreement with Havana would lead to broad improvement in relations between the two countries.

Presidential press Ron Ziegler cited President

WASHINGTON, Nov. 16 (IHT). Nixon's comments in a news.
The United States today an-paper interview last week in which he declared that there would be no change in American policy toward Havana unti Premier Fidel Castro changed his revolutionary policies toward the United States and Latin America. Mr. Bray said today that Sec

retary Rogers would emphasize the U.S. desire to conclude ar agreement in the most expedi tious and effective way. While not ruling out direct talks between American and Cuban diplomats, U.S. Ifficials

said that it was more lively the contacts would be carried ou through Swiss intermediaries. Mr. Bray was asked whether the United States would agree to Cuba's call for the return of ref

ugees who seize ships to escape to the United States. He replied that the U.S. government was not yet ready to ex plore what may or may not be important to the two govern

ments. The U.S. intention, he said, was to make it clear to potentia hijackers that both government intended to cooperate to prevent

hijacking of airliners. "In respect to this matter, we

are prepared to engage in any process which will bring results. Mr. Bray said.

ROME, Nov. 16 (AP).-Juan D. ments concerning his possible Peron said tonight he had sent presidential candidacy in Arelections.

> "I am not a dictator as some say," he said "If the Peronist movement, that is the Argentine people, asks me to be a candidate I will agree. I am a slave of the people."

He said he was unable to say how long he would stay in Argentina. "My case is that of a mason who is engaged in a job and does not know how long it will take."

Asked about his possible policy toward the United States in case he came to power again, he said: "My policy will be set in agree-

ment with the results of technological and planning studies. I cannot say something I do not know. If I were to rule the country again the very first thing I would do is to unpack a package and see what it contains."

For Reconciliation

Mr. Peron, who spoke in Spanish, said he was going to Argentina "to propose a pacification and reconciliation among the Argentine people. The existence of hatreds among brothers is unacceptable and non-existent for me. The reconciliation I am looking for is for all Argentines, including the military men who overthrew me, I am a man who has no memory for such rancors. I forgot everything. This is the time for great men, not for little

Meanwhile, Argentine President Agustin Lanuase was quoted today saying he is willing to meet the former dictator at any time. But, Mr. Lanusse said, Mr. Peron must first make it clear on his return home from exile that he wants to help bring parliamentary democracy back to Argentina.

"There are many chances to arrive at an ample agreement and we must arrive at it," Mr. Lanusse was quoted as saying in an interview to Milan's independent paper, Corriere della Sera. It also quoted former Argentine President Arturo Frondizi as saying he had advised Mr. Peron to stay in Madrid.

"I believe that the whole operation is part of a plan by the military to stay on in power," he said. "Our struggle consists precisely in preventing this."

Press Conferences Set

BUENOS AIRES, Nov. 16 (AP) -Mr. Peron's Justicialist party confirmed today that the former president will spend the first two days of his return to Argentina at heavily guarded Ezeiza Inter-national Airport.

A communiqué announced that Mr. Peron would hold press conferences at the airport hotel tomorrow and Saturday.

Peronist sources indicated he might stay in Argentina less than a week and then visit other Latin American capitals.

More than 30,000 soldiers and policemen have been assigned to security. Their primary job is to keep Mr. Peron's followers from reaching the airport to welcome their leader. Ezeiza is 30 miles from Buenos Aires and is

surrounded by open fields. Fifteen people caught by police grouped in a street shouting Mr. Peron's name were arrested and falled for 30 days. Army units moved discreptly into strategic positions around

the capital under a full state of alert and cancellation of all leave. The army set up check points on access roads into the capital. Infantry and armored units bivouacked in soccer stadiums.

that any government payments were involved. His regime says money collected

privately by West German citizens has been frozen in West German bank accounts, for payment to East Germany upon release of the East Germans. After previously avoiding headon conflict over the treaty, Mr.

Barzel's decision to attack it strongly could cut into the popularity of Mr. Brandt's peace policy if the charges stick, observers said.

Inflation Issue

Meanwhile, in speeches Mr. Barzel pressed his strongest suit -inflation A report damaging for Mr. Brandt disclosed today that food prices in October were running 7.9 percent above the year-before level.

As a measure of interest in the hard-fought campaign, a recent poll predicted that more than 90 percent of eligible voters would turn out on Sunday to choose between Mr. Brandt and Mr. Barzel-the highest turnout in the nation's post-war history.

In Stuttgart tonight, police imposed a maximum alert after receiving information that several as:assination threats had been made against Mr. Brandt, who addressed an election rally there.

Indians Occupy Nebraska Park Over Land Issue

CRAWFORD, Neb., Nov. 16 (AP) .- A group of about 50 militant Indians occupied the former commander's quarters at Fort Robinson State Park here resterday. Crazy Horse was killed nearly 100 years ago on the site. The Indians evacuated the park

today. The occupation protested the transfer of U.S. government land to Nebraska. The Indians left after negotiating with a representative of Gov. J.J. Exon.

Vince Rotherham, superintendent of the museum now housed in the building, said that the Indians "departed peacefully" after the session with Jerry Kromberg, the governor's planning director.

Mr. Kromberg said that the Indians agreed to vacate the building witi- no damage or theft of its contents in return for the promise of a new meeting with him Tuesday so that they can present their arguments.

The governor's office pledged to respond to the Indians by Dec. 1, Mr. Kromberg said.

Brandt Duels Final Round of Vietnam Talks Arab-Israel Is Expected in Paris Shortly Talks Plan (Continued from Page 1)

(Continued from Page 1) are Copenhagen, Vienna, Singapore, Kuala Lumpur in Malaysia, or possibly a site in Switzerland other than Geneva. It is also possible that the conference, which is expected to meet only periodically rather than on any continuing basis, might rotate to various meeting places, and that its chairmanship might also rotate on the same basis as the UN Security Council order of rotation.

In any case, it looks as if the role of the international conference is going to be fairly circumscribed—not only as to its actual functions, but even limiting its competence to Vietnam. It will not, as presently projected, have any "supervisory role" or powers 'over conditions in either Cambodia or Laos,

The main function of the conference, apparently, will be to receive reports from the ceasefire commission which will be policing events and conditions on the spot in South Vietnam. The four nations which will comprise the commission are Canada, Poland, Hungary and Indonesia, with each country expected to provide a small "peace-keeping" force to patrol, spot-check and investigate cease-fire violations Its reports will then go to the international conference, which

will decide what action to take. The presence of the UN secretary-general at the conference is apparently designed to bring the UN into direct play, both in acting on the reports and most probably in ultimately acting to supervise the elections in Vietnam, which are to follow the political negotiations between the Saigon government and the Viet Cong.

Thus, about all that emerges clearly from the whole concept of adding an international conference to the cease-fire agreement and machinery is that the role of the conference is going to be both distant and fuzzy. Apparently neither the North Vietnamese nor the South Vietnamese and the United States want an active supervisory conference, and hence it is to be kept rotating in meetgreat distance from Vietnam.

Meanwhile, the regular 167th session of the plenary sessions of the Vietnam peace talks was held as usual today—and produced the first sign of strain on the ceasefire machinery even before the cease-fire is signed. Under questioning, the North Vietnamese spokesman made it clear that Hanoi had accepted Indopesia as a member of the cease-fire control commission only under pressure and insistence from the United States. Without naming Indonesia, he spoke of one of the four countries as being subservient to the United States and a supporter of the bombing of Vietnam which had even urged that the Americans attack the North Vietnamese dike sys-

the Western powers have taken the position that it is necessary to separate the highly complicated and probably long-lasting talks on reducing ground forces in Central Europe from the broader European security conference. Many countries will attend the security conference which are not directly involved in the MBFR

Mr. Scheel stressed the need for both the great powers, the United States and Russia, to play an active role in these conferences. Without them, neither relaxation of tensions nor cooperation are possible," he said.

The foreign minister said the negotiations will not deal with the convergence of contradictory systems, but will try to achieve what he called "a new and better order in Europe" by reducing the factors which encourage tensions. In addition to the Central European powers themselves, the proposal calls for inclusion of allied states on both sides of the Iron Curtain which have military

forces stationed in the area. "There will be no dissolving of alliances," Mr. Scheel said. "NATO remans firm, and in the coming years our defenses will be increased and improved."

One certain problem was whether the European security conference should create some sort of permanent organization to oversee the peace. The Warsaw Pact nations want this, Mr. Scheel said, but the West would prefer to use existing international or-<u>ennizations</u>

it may be necessary to establish new organizations where no international unit already exists. In this case, Mr. Scheel said, West Germany would propose putting them in Berlin, at the heart of the European problem. @ Los Angeles Times.

He said that in special cases

ident Anwar Sadat. Our main objective at this stage is the liberation of all occupied Arab

regions without any exceptions." The goal of U.S. foreign policy since the August, 1970, cease-fire has been to arrange indirect talks. but Egypt, after accepting the idea, backed out early this year when the United States resumed arms shipments to Israel.

According to An Nahar, the sponsors of the new plan say that it would break the deadlock resulting from Israel's insistence on and Arab rejection of direct

It would also guarantee Palestinian guerrilla representation in the talks through their membership in the Arab League, the paper said_

The two regions of the proposed state of Palestine, the West Bank and Gaza, are to be linked together by a land corridor that could also serve as the new border line between Egypt and Israel An Nahar said.

The new state is to have a provisional government, initially without ministries for foreign affairs or defense. A foreign affairs ministry would be set up after three years, when the new state would also be admitted to the United Nations, A defense ministry would be established two years after UN entry, An Nahar said.

This version of the Palestinian state differs from King Hussein's plan, in which the West Bank and Gaza are part of a federal Hashemite throne.

Eban Denies Report On Planned Talks

TEL AVIV, Nov. 16 (Reuters). -Israeli Foreign Minister Abba Eban said today there was no truth in reports that the massacre of Israeli sportsmen at the Munich Olympic Games had prevented a planned meeting between Israeli and Egyptian representatives on possible peace negotiations.

The minister was commenting at a commercial club gathering in Kiryat Gat, southern Israel, on a New York Times report (published in Thursday's Interna-tional Herald Tribune: from This had said that the killing of the 11 sportsmen may have been aimed at stopping direct, secret contacts between Israel and Egypt towards open-ing peace negotiations, agreed a

Tear Gas Used To Halt Jail Riot In Pennsylvania

PHILADELPHIA, Nov. 16 (AP), -State police used tear gas to-day to quell a disturbance at the huge Eastern State Correctional Institution to nearby Graterford after inmates assaulted three guards, seized the maximum-security block and set fire to mattresses.

The rebelling inmates held the block for nearly three hours. Warden Robert L. Johnson said the prisoners were unhappy because they aren't allowed to have radios or television. "We discovered that some in-

mates were making weapons with the personal items" Johnson said, explaining why they were taken away several month

State police commissioner Rocco $Army\ Board$ Urella dispatched 60 troopers to the scene after an emergency call from Mr. Johnson

The trouble erupted shortly before 8:30 a.m. as guard Joseph McCracken, 48, was ascerting a group of 35 men in the block to the exercise yard. He was knocked to the floor and fighting began.

Guards Thomas McCauley, 50, and Herbert Williamson, 36, rushed to Mr. McCracken's aid. All were armed with small clubs, and they managed to get out of the block and lock the door, preventing an escape. They were treated for bruises and went back on

UN Report Cites Proposals

So. Africa Offers Concessions In Rule of South-West Africa

From Wire Dispaiches UNITED NATIONS, N.Y., Nov. 16 .- South Africa has offered to make concessions in its administration of Namible, a UN report disclosed today, but the proposals have already drawn criticism from black African nations as un-

acceptable. The concessions on Namibia, known as South-West Africa in the United Nations, were communicated to UN special envoy Alfred Martin Escher during his visit to Pretoriz and South-West Africa last month. Mr. Escher's report to the Security Council listed two main concessions suggested by South Africa:

The creation of an advisory council made up of representatives of regional bodies in South-West Africa to assist South Africa in administering the territory.

• More freedom of speech and movement for the various indigenous peoples of South-West

Mr. Escher indicated he con-sidered the concessions worthwhile enough to continue the dialogue with South Africa on the future of South-West Africa. However, UN Secretary-General Kurt-Waldheim, in transmitting the report to the Security Council, did not specifically recommend an extension of Mr. Escher's man-

Instead, Mr. Waldhaim merely expressed the hope that Mr. Escher's report "provides a useful basis for the council to consider and to decide on the future course of action."

Mr. Escher said: "Although my discussions with the prime minister of South Africa leave a number of issues still to be clarified, I believe that what has been agreed to by the prime minister represents some progress in the direction of achieving the objective laid down by the Security Council.

A point South African government leaders and Prime Minister John Vorster readily supported, Mr. Escher said, was that the contacts initiated by Mr. Waldhelm last March and continued by Mr. Escher should be continued.

Mr. Escher said he believed the Security Council should approve a continuation of the contacts to pursue points already agreed upon and "questions which could not be brought to a conclusion as yet." In the latter is eventual South-West African self-determination leading to an independent nation. a subject about which, Mr. Escher said, Mr. Vorster thought it "was not the appropriate stage" to discuss in detail.

Mr. Escher said Mr. Vorster thought that after the inhabitants of South-West Africa "have had more administrative and political experience," which was "an essential element for eventual self-determination," Mr. Vorster felt that this [self-determination] could best be achieved on a regional basis." However, the South African system of creating partitions is unacceptable to the United Nations.

seemed to me acceptable in principle, provided that the necessary conditions for the exercise of selfdetermination were fulfilled and at the same time an authority for the whole territory would be established."

African reaction to Mr. Escher's report was swift in condemnation. particularly on this point. One ambassador said Mr. Vorster's attitude was "an insult." Another said the results of Mr. Escher's talks were 'far from satisfying.' The Security Council is expected to take up the report and decide on the extension of the talks next

In other UN action: The United States renewed a demand first made 26 years ago for its share of the UN budget to be cut from \$1.52 to 25 percent. Sen. Gale W. McGee, D., Wyo., speaking for the U.S. delegation in the General Assembly's bud-getary committee, said the interests of the world body could be damaged if the request was refused. The U.S. Congress already has voted to apply the reduction in 1974 regardless of any UN decision.

· A U.S. proposal for a treaty punishing international terrorists ran into expected African opposition yesterday while Britain favored going further than the United States. Poland and Czechoslovakia indicated in speeches at the General As-

To See Calley

WASHINGTON, Nov. 16 (AP). —A board of three officers will visit Lt. William L. Calley jr., Nov. 27 to bear his appeal for clemency in the 20-year sentence he is serving for mass murder in My Lai.

The board's visit, an unusual step authorized by the Secretary of the Army, bypasses a number of routine channels and is sepa-rate from a hearing the Army's Court of Military Review has scheduled for Dec. 4.

The 29-year-old Calley, convicted of at least 22 murders in the South Vietnamese hamlet has been under house arrest at Fort Benning, Gs., since he was sentenced on March 31, 1971

Oldest Geisha Retires KOBE, Japan, Nov. 16 (Reu-ters).—Eighty-eight-year-old Kyokoma Hanakuma has retired as Japan's oldest geisha "girl." About-100 patrons toasted her retire-ment last night at the end of

a 71-year career.

sembly's legal committee that the Soviet bloc would join in condemning terrorism, but seek a compromise between the Western and African countries on the measures to be taken.

The United States has asked the General Assembly to convens a world meeting next year to approve its draft treaty requiring extradition or punishment of terrorists acting outside their own countries or committing acts harmful to other countries and their citizens.

Russia declared its support for 13 Pacific and Asian nations who are co-sponsoring a draft resolution aimed at stopping French nuclear tests in the Pacific. But observers said that by also declaring support for a proposed amendment to the resolution, tendered by Belgium and seven other nations, the Russians had sought to broaden its thrust to condemn China's atmospheric nuclear testing program. The amendment seeks to delete the druft's reference to testing "in the Pacific."

The co-sponsors-Australia, Bolivia, Chile, Colombia, Ecuador, Fiji, Indonesia, Japan, Malaysia, New Zealand, Peru, the Philippines and Thailand-have declared opposition to the amendment

Tuna Boats Fined \$540,000 by Quito

QUITO, Nov. 16 (Reuters),-Ecuador has imposed fines totaling almost \$540,000 on six American fishing boats and one Canadian vessel for fishing within the country's disputed 200-mile limit. National Fishing Director Guilermo Alban Semanate imposed the fines in Salinas, where the boats have been held since Sun-

Three other foreign boths are awaiting court decisions. Two of them are U.S. vessels arrested Tuesday and yesterday, the third is a Japanese trawier also detained yesterday.

Dead Man Claims His 6th Victim

BEAURECUEIL, France, Nov. 16 (Reuters).—A house booby-trapped by an evicted miner who committed suicide last Thursday, today claimed a sixth life, that of an explosives expert probing the rubble of the building.

Five persons, including

policemen and the miner's landlady, were killed last Friday when they triggered a dynamite charge while trying to enter the apartment where Jean Pica, 55, had lived. Today's explosion, apparently

caused by a charge of dynamite which had remained intact in the earlier blast, also seriously injured three firemen taking part

Mr. Escher, however, said: "This Woman Jailed in Paris Killing Tied to Mideast

PARIS, Nov. 16 OPI).-The rèse Lefebvre, 45, was jailed today after police charged her with being an accomplice in the shooting death Monday of selfstyled Syrian journalist Khodr Kannon. They said she lent her car to the killers.

The women a medical technician, told police that the car had been stolen from her. Witnesses to the getaway gave the license number to police. The Paris correspondent for

the Tel Aviv newspaper Yedith reported that Mr. Kannon was an Israeli agent who had in-filtrated el-Patah, a Palestinisa guerrilla organization. When Mr. Kannon was found out Fatah ordered his death, the journalist said his sources told him.

Pollution in Tokyo TOKYO, Nov. 16 (AP).-The

Tokyo metropolitan government reported today that 495 children in Tokyo have been confirmed to be suffering from illnesses linked to air pollution. It said the figure is probably much higher, and may actually involve up to 20,000 of the city's 2.5 million children under the age of 15.

thorities-Mr. Gray had made or

At one point, Mr. Gray and Assistant Attorney General Henry Peterson authorized the FBI office in Knoxville, Tenn., to prepare a felse "White House statement" giving the hijackers a "grant" of \$10 million, the amount of ransom they originally demanded.

The document, typed on parch-ment with "The White House, Washington, D.C." at the top, and a U.S. attorney's seal at the bottom, carried the false signature of John D. Ehrlichman, President Nixon's chief domestic adviser. It was "witnessed" with the false signature of John Wesley Dean, counsel to the President, and "certified" by "John F. Davis," identified as clerk of the Supreme Court. (The clerk of the Supreme Court is actually l'ichael Rodak jr.).

The document, utterly worth-less and without legal effect, was passed into the plane along with an estimated \$2 million in cash, bulletproof vests and other materials demanded by the hijackers in Chattanooga, Tenn.

'Compensation' Offered Just before the airplane made its final landing in Havana, the hijackers distributed some of the ransom money to several of the passengers as "compensation" for any "inconvenience" they had

But Cuben anthorities required the passengers to hand over the money, along with the rest that was still in the possession of the hijackers at the end of the flight.

The FBI, concerned to create a deterrent against future hijackings, has asked both the State Department and the office of Henry Kissinger, Mr. Nixon's national security adviser, to press the Soviet Union for assistance in persuading the Cuban government to extradite the three hijackers as well as four others who recently forced an Eastern Air Lines jet

NEW YORK SNOW-Cars making way slowly through slush on Wednesday near Albany, as area was hit by heaviest early snowfall in 72 years, 17 inches of it.

Snowstorm Hits Northeast U.S., 3 Deaths Cited

NEW YORK, NOV. 16 (API. —Much of the northeastern part of the United States was buried under a half-foot or more of snow yesterday after the first major snowstorm of the season.

Some Great Lakes communities were tackling widespread damage from gale-force winds and giant waves.

Snow up to 19 inches deep was reported in parts of New Hampshire, Vermont, Massechusetts and Maine. At least three deaths were attributed

Albany, N.Y., was smacked with 17.3 inches of snow, the second worst November storm in the city's history, and most of the rest of eastern New York State plowed through a half-foot of snow.

In Washington, White House press secretary Ron Ziegler said that Mr. Nixon wanted to talk to the campaign head of the Democrats for Nixon organization about restructuring the federal bureaucracy and "a number of other

Asked if the President was offering Mr. Connally a post to his second-term cabinet. Mr. Ziegler said, "I don't want to say anything that would continue or increase speculation along that

"I know it's going to be difficult for you not to write this," Mr Ziegler said, adding that the President has made no personnel decisions nor extended any offer

Mr. Nixon also conferred with members of the White House staff and talked by telephone with

But Weathermen Are Hard to Find

U.S. Investigating Leftist Guerrilla Group WASHINGTON, Nov. 16 (WP). the proceeds, the department

-The U.S. Justice Department has launched a new investigation of the radical leftist Weathermen organization and hopes to indict some of its membersincluding federal fugitives now living underground-in connection with bombing incidents in various parts of the United

One grand jury probe by the department's Internal Security Division has been under way in San Francisco for more than two months. Another will open soon in a different city.

Administration officials, including Assistant Attorney General A. William Olson, chief of the Internal Security Division, are confident that their new offensive against the Weathermen will bring more cases into federal court. It is said to be based on recently obtained intelligence in-

The officials admit to frustration, however, in their attempts to track down some of the bestknown members of the group. Several have been fugitives for more than two years.

On Caribbean Isle

One fugitive, Joseph Edwin Schook, under indictment in Idaho for the destruction of 29 military vehicles, has been located on the French Caribbean island of Martinique. But the French government has declined to extradite him to the United States, on the grounds that he is sought for a "political crime." The Weathermen, now often called the "Weather People" because of the objections of some women members to the original name, broke from the Students

a 1969 strategy disagreement. The "Weather Underground" has claimed responsibility for some bombing incidents in letters to newspapers and news agencies. Federal authorities trace many of the incidents to a January, 1970. "war council" in Flint, Mich., of

for a Democratic Society after

about 400 members of the group. Officially, the Justice Department says that it is not using grand juries to look for fugitives and that this search is the job of the FBI.

Support Threatened

But federal prosecutors believe that they have identified and successfully threatened Weathermen's "underground support system" with several fraud indictments not previously linked publicly to the terrorist organiza-

Those indictments, some of which have resulted in guilty pleas or convictions after trial, involve the purchase of travelers checks under false names by friends of individuals who are underground.

According to the Justice Department, the travelers checks his feet on another's bunk. The are promptly cashed but reported by the purchasers to have been stolen or lost. Substitute sidents, mostly black, ashore. He and his assailant, who was put in the ship's brig pending com-pletion of an investigation, are travelers checks issued by banks are then turned over to the Weath-

believes.

As Assistant Attorney General Olson put it this week, "This is their means of staying underground... a form of expropriation from the establishment, He also said that the fugitives

are often aided by friends who obtain false identity documents for them, including the birth certificates and Social Security cards of persons who died as vonng children.

Identity a Problem

In some instances, individuals under indictment have used so many pseudonyms that federal authorities apparently have difficulty determining who they

Several of the witnesses subpoenaed in the San Francisco grand jury investigation-including a conservationist from that city, a physicist from Minnesota and a Public Health Service doctor from San Juan, Puerto Rico-have been questioned about whether they ever obtained false identities for federal fugitives or served as "mail drops" for them.

After the Supreme Court refused Monday to consider their claim that some of the grand jury's questions were based on illegal electronic surveillance, those witnesses agreed to testify this week rather than go to jail indefinitely on contempt-of-court

charges. The San Francisco grand jury is focusing on several northern California bombings, including one at the San Francisco County Hall of Justice and another at a police substation in that city in February, 1970. It also is asking witnesses about their visits to an alleged "bomb factory" in San Francisco.

Life Style Cited

Mr. Olson suggested that the Weathermen's success in cluding authorities is based in part on "their communal life style" and "the lack of informants" inside the organization.

"These are pretty smart people. with high IQs," he said, "They are not the type of person who went into crime because they couldn't make it at anything

2 Black Students Are Slain In Louisiana Campus Battle

BATON ROUGE, La., Nov. 16 (UPI).—Two students died today es sheriff's deputies and militant blacks battled for control of the Southern University administration building today, exchanging gunfire, bomb blasts and tear gas. Sheriff Al Amiss said his men did not fire their pistols, rifles or

shotguns when they swept onto the campus with leashed dogs at their sides to oust the blacks who had taken over the building.

"As far as I know, none of our men fired shotguns or their rifles," the sheriff said. "We heard two shots from pistols from Mr. Amiss said deputies fired

only tear gas. He said tear gas canisters and fragmentation bombs were thrown at officers from the crowd of students during the 10-minute battle. But Mayor W. W. Dumas of

Baton Rouge said that "two have been shot and there may be more if necessary."
"We've sent the dogs in to get them out of the building. We

are going to take back over the administration building at any Coroner Hypolite Landry said the two victims were black men. He said they apparently were shot. Mr. Amiss said of one of the dead men; "How he was

like he was trampled." Later, however, Raymond Pot-ter, administrator at Earl K. Long Hospital where one of the victims was taken, said a coroner's report showed that the unidentifled victim died of a shotyun

black college had boycotted the Buton Rouge and New Orleans campus. The students sought the resignation of the school president and more student control over campus life.

Students held the New Orleans administration building for eight days but gave it up when the president of that campus resumed. Blacks at the Baton Rouge campus took over the administration

building today.

After the shooting, the police barricaded the campus. Ambulances sped on and off the college crounds.

Gov. Edwin Edwards called out 700 National Guard troops to restore calm at the school, which has an enrollment of 2,400.

Rhodesian Drink Law Is Upset

SALISBURY, Rhodesia, Nov. 16 (Reuters).—The Rhodesian High Court today quashed government legislation introduced early this month to prevent Africans from drinking at hotels in white areas after certain hours. A judgment declared that the regulations were illegal and or-dered that the government ray

the costs. The appeal against the regulations, which sought to prevent Africans from drinking at hotels white areas after 7 p.m. on weekdays and 1 p.m. on Saturdays, was brought before the High Court by three hotels and an African journalist, Justin

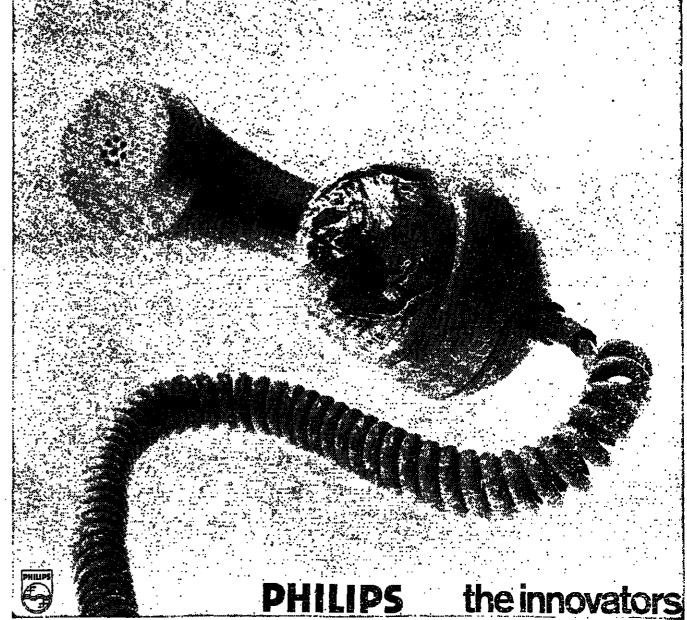

Look what a new exchange can do Let's suppose you're a doctor. This is how the new Philips PRX

telephone exchange can help you. Transfer your calls from home to hospital and vice versa, automatically. Allow you to use three-digit numbers for frequently needed multi-digit connections. Signal on a busy line that you're waiting. Give you a no-dialling hot-line facility with the ambulance service. Even wake you up in the morning.

These are a few of the features that can be made available to all

subscribers, once a new Philips PRX exchange has been installed. Advanced today, still modern in 2003. -

Czechs Unsure of Methods in Ideological Drive

By James Feron PRAGUE, Nov. 16 (NYT).— Crechoslovakia's Communist leaders have launched a major ideological drive to attract public approval and support in the face of widespread apathy and resent-

The campaign, intended to inspire a dialogue with a dissifected citizenry, has been spurred by the party's need to counter growing "diversions" from the West through television, tourism and publications.

But the party leadership appears confused over how it should proceed. A recent Central Committee meeting on the issue ended indecisively, with the final speech of the party teader, Gustav Husak, summarized only

briefly in the press.

A party official spoke frankly a few days ago of the "passivity" among Czechoslovaks toward their leaders. People are interested now only in consumer goods, and in eating well—an "emigration into the belly," as some put

Mr. Husak and his colleagues have purged the party, the gov-

ernment, industry and the arts of all traces of support for Alexander Dubcek, the reformist party chief whose brief attempt to "humanize" Czechoslovak Communism was crushed by Sovietled military forces in 1968.

Although the political and ideological threats posed by Mr. Dubcek's liberal ideas have been thoroughly erased, no clearly defined program appears to have Paris Marches been drafted in their place.

In the meantime, many intellectuals and former administrators remain out of work, severely diminished in rank or "building the [Prague] metro," a term that has come to mean all forms of manual labor.

Passivity Recognized

They wait for some distinctly new party policy or a sign that the purges have reached bottom, but find only contradiction and apparent uncertainty in public statements by party leaders, some of whom evidently see a lingering threat in scattered signs of

"We recognize the passivity in the nation," a party official said,

new threat of ideological diversion from the West."

This threat is expected to become acute next year, when the Communist nations of Eastern Europe may be obliged to

accept some of the "free movement of people, ideas and infor-

Mark Walkouts

PARIS. Nov. 16 (UPI) .- Thousands of banner-waving miners and hospital workers marched in separate processions through Paris today, demanding better wages and working conditions.

Railwaymen, continuing a selective strike, stayed away from work in the southeast. Garbagemen struck in some towns, and television staffs scheduled a 24hour strike. France has been swept by a

wave of industrial unrest since the government announced that September's cost of living figures were 6.2 percent higher than the same month in 1971,

are demanding for the political status quo sought by Moscow at the forthcoming European security conference.

"We have nearly 2,000,000 Czechs watching Austrian and West German television along our borders now," the official said. "It is difficult to disrupt these programs from the technical point of view. If we disturb them, we disturb our own programs.

He spoke of tentative plans to permit the limited sale in Czechoslovakia of Western publications. but only in the major cities. "We are not willing to let our people be unduly influenced by these publications," the official said.

"We know we must compete with these influences. We must demonstrate that our party is attractive. The government and party must show that the stendard of living is so good that people will feel the party is doing things for them." He was speaking on the 55th anniversary of the Russian Revolution, with red banners all over the city.

But how was the party to

Gustav Husak

its point across to a people who shrugged off the official word even during more relaxed times? The official said there would be greater numbers of lectures and meetings, and better speakers.

"The lecturers will not be speaking stupidities. If they appear as demagogues, the people Attempt to Alter Soviet Image

Prague Exhibit Shows 'New' Russi

PRAGUE, Nov. 18 (NYT) .- The Pussians are offering Czechoslovaks an opportunity to see the Soviet Union in a new light-as a modern society burgting with attractive consumer goods and handsomely dressed young people.

This new image is expressed in a Soviet exhibition, the largest mounted in history in Eastern Europe, that has drawn on the talents and imagination of Czechoslovak artists to offer a swinging picture of Soviet life.

The challenge facing the organizers was considerable. For one thing, there is still deep resentment over the Soviet-led invesion by Warsew Pact forces in 1988 when orthodox Communism was reimposed here to place of the reforms undertaken by Alexander Dubcek, then the party leader.

The 60,000 Soviet troops that remain are a constant preoccupation for many Czechs, virtually the only outlet for whom is jokes about the soldiers. Example: A soldier returns home and de-

scribes Prague as backward—"not a single delousing station."

The exhibition's organizers also had to cope with a sophisticated audience, wise in the ways of consumer products. The attitude was summed up by a woman who scanned Soviet industrial goods just inside the entrance and growled, "We were making this stuff before they ever heard of it." Nonetheless, the exhibition, which honors the 65th anniversary of the Russian Revolution, seems to be overcoming at least come perhaps a good part of the resentment and akenticism. This appears to be especially true among those who do not live in

Prague; they are really impressed. Westerners tamiliar with major Soviet exhibitions in Moscow and at international fairs say this is the most attractive they have seen. It relies heavily on crowdpleasing techniques, in cluding special lighting, automated dis-plays and other electronic inno-

It is nowhere better demonstrated than in a multimedia fashion show presented hourly in g main hall. It begins as a film show, in color, on five screensone in the center that occasionally offers two and three images, one on each side and two above.

Fast-Paced Plot The fast-paced 45-minute plot depicts a young Czech arriving in Moscow and seeing many of its sights with the casual assistance of an unlikely taxi driver, an attractive woman modishly out-fitted and other smart young Muscovites.

The actors appear on the stage several times during the presentation, modeling the outfits while the screened action continues around them. At times they seem

Britain Notes Arms Talks With Egypt

Supplies to Mideast Are Not Embargoed

LONDON, Nov. 16 (Reuters).— Britain is having talks with Egypt on the sale of British military equipment, a British Foreign Office spokesman said here today.

The spokesman answering questions from reporters at his daily press conference, said: "We have been having talks with Egypt about the supply of military equipment. The Egyptians have given us some indication of what they want and we have made clear to them what we would be prepared to supply. Our policy on arms sales to Middle East countries has not changed."

The spokesman said that it was not the Foreign Office's practice to disclose details of arms sales talks. He recalled that Britain did not operate an embargo on the sale of British arms to Middle East countries. But British policy was to insure that any British arms supplies would not upset the balance of military power in that region.

Talks Continue

The spokesman said that the talks with the Egyptians began several months ago and were continuing

Several missions from Egypthave visited British arms manu-

But the spokesman declined to comment on recent press speculation that Britain was not willing to sell Chieftain tanks to Egypt and that the Egyptians also had shown an interest in buying

Lightning jet fighters.

He said that the Foreign Office did not publicly comment on any specific arms orders, projected orders or requests for arms supplies.

Arah Arms Yound

KUWAIT, Nov. 16 (AP).—Egypt proposed yesterday that Arab countries set aside 15 percent of their national incomes for a collective military plan to include purchase of modern warplanes and establishment of an Arab arms industry.

The Egyptian chief of staff, Lt. Gen. Saad Shazly, made the proposal in a report on the Middle East situation to Arab foreign and defense ministers meeting in

The proposal was directed, in effect, to Arab countries that have immense incomes. Those confronting Israel directly already are spending heavily on arming

According to conference sources, Gen. Shazly said that pooling of financial resources must be within the framework of a concerted Arab plan to buy modern fighter-bombers for Arab air forces. He did not mention any particular source for the purchase.

Jacques Cartier Minf of Canada LIMITED EDITION*

The Royal Wedding Anniversary Plate

by Pietro Annigoni, official portraitist to HM Queen Elizabeth II and HRH Prince Philip

Original Issue Price • Sculptured Sterling Silver \$195 • 22 Karat Gold \$2500

A famous Florentine Master eloquently commemorates the November 20th sliver wedding anniversary of The Queen and Prince Philip exclusively for this, the premiere issue of the Jacques Cartier Mint of Canada.

First in a masterpiece series by Sig. Pietro Annigoni, this limited edition Collector's plate measures 10" in diameter. It contains 17 troy ounces sterling or 25 troy ounces gold, and is accompanied by a certification of authenticity inscribed with the owner's name. Individually minted, the plate is cast in high relief, capturing the magnificent sculptured quality of the original work bearing the signature of the artist Annigoni. The rim is polished to a flawless mirror-like finish.

Authorized by St. James Palace, this limited edition is serially numbered and bears the distinguished mint mark of Jacques Cartler Mint. Crafted in perfect mint finish, it is presented in its own elegant protective case for permanent display.

All orders subject to acceptance by the Jacques Cartier Mint. All monies received after this strictly limited issue will be promptly refunded.

Pilots and Politicians

agreement with the United States on the much-vexed question of aerial hijacking. Its political importance, as possibly the beginning of an easing of tensions be "een Havana and Washington, is great, and, of course, there are politics built into any approach of this kind, Cuba wants some form of restriction on the activities of anti-Castro Cubans in the United States and "illegal" departures of Cubans for the United States.

This may not be the easiest thing in the world to work out, since it brings up the whole matter of asylum and the refugee, just as the United Nations' discussions of international terrorism have bogged down in arguments about the causes of terror. Should any individual or a group who leap the Berlin wall, or set out in a battered launch for Miami, or, for that matter, wade the Rio Grande and flee to Cuba by way of Mexico -none of them risking anyone's life but his own—be judged on the same basis as the hijacker who places a planeful of innocents in jeopardy for his own purposes, whether venal or altruistic?

The pilots of the world, those whose responsibility it is to see that their planes fly safely from point A to point B, do not see the hijacker in any particular political or social context. All they know is that they, a thing or two.

Cuba has put forward a suggestion for their ground crews, and those who manufacture their equipment have given much thought to seeing to it that their mission can be accomplished, and that they, their crew and their passengers can travel about the world on their lawful occasions. They have been elaborately prepared to fight equipment failure and storms. They are aware of the possibly fatal effects of human error. But when those consequences are courted, deliberately, by any persons, that Is a crime against all the pilots stand for, as well as a threat to them personally.

Whether the cause the pilots are now sustaining-national and international efforts to control hijacking—can be advanced by grounding the world's planes in the threatened strike may be debatable. But that the cause is good, and that there is such a thing as an international crime, to be suppressed whatever its motives, can be sustained in any objective court of opinion. The pirate still is what the world believed him to be in the days of sailing ships: The enemy of the human race. Not the only one, to be sure, and probably not the worst. But he cannot be tolerated until all the other ills of humankind are abolished, because he makes those worse. In this respect, the pilots can tell the politicians, and the sociologists,

Civilians and Brass

The re-elected President Nixon says he Defense alone—and many superfluous jobs will not exempt the Defense Department the Washington Star-News revealed a the very least is open to dangerous misinterpretation.

Cutbacks in strategic hardware or military personnel can be only "minimal," Mr. Nixon said. Rather, the targets for thinning down must be among "the masses of civilian employees who are getting in the way of each other over in the Pentagon and around the country."

Surely civilians are not all bad for the Pentagon. The fact is that the Department of Defense is now embarked on a far-reaching and overdue "civilianization" program, to transfer a variety of desk and other noncombat jobs from military personnel to civilians. Strongly supporting this effort, the House Appropriations Committee noted that "in general it is less expensive to use civilian labor even when the basic pay for the civilian may exceed the basic military pay. Costs asmilitary labor."

Jobs such as data processing, supply management, even K.P. duty rightly belong in the lower-cost civilian sector, though the House committee is wise to insist that any transfer of duties be accompanied by a corresponding reduction in total military persennel, not a further padding of the federal

The structure of civilian bureaucrats in the Pentagon is indeed top-heavy-an estimated 1,700 on the staff of the Secretary of

can be eliminated by closing military instalfrom his cuts in government spending. So lations around the country, as is now antimuch to the good. But his interview with cipated. But Mr. Nixon must know that it is really the military brass who are "getting strange quirk in his thinking, one that at in the way of each other," and this is a trend which has soared alarmingly in his four years in office. Current budget figures indicate active duty rosters of one officer or NCO for every lower-ranking enlisted man. In 1969 the ratio was one to two. There is now one general or admiral for every 1,840 personnel, compared with one to 2,900 in 1969, according to a study by retired Gen. James M. Gavin.

> With the shift in military manpower toward ever higher grades, the costs in wages and benefits inevitably rise, even without the necessary pay increases of the past few years. Military manpower now accounts for 56 percent of the defense budget, and more than 80 percent of the increases in defense spending over the past 10 years is the result of higher manpower costs.

It is too late in the current fiscal year for any "civilianization" programs or manpower sociated with training, rotational moves and cuts to have much significant impact on this health care greatly increase the real cost of year's spending-indeed, termination costs could even produce a slight increase. The best way to cut defense spending is by deferring deployment of costly, unneeded weapons systems, but since Mr. Nixon's campaign platform showed no inclination to take that obvious step, at least his budget planners for fiscal year 1974 should recognize that the possibilities for cuts in military personnel are far from "minimal." Excess of civilians is among the least of the Pentagon's

THE NEW YORK TIMES.

Bad Dream Comes True in Uganda

The idea of expelling the thousands of "Africanize." The way is now clear for Asians living in Uganda came to him, Uganda's Gen. Amin has said, in a dream. It was an ugly dream and it has now come irne. Up to a day or so ago, meeting the leadline the volatile leader had set for himsell, he had dispossessed and expelled some 10,600 Asians, many of them residents of Uganda for two or three generations. The ew thousand left behind-most of them with Igandan citizenship—evidently are being Esmissed from the towns and sent to rusticate in the bush. Whether they are more to be invied or pitled remains to be seen.

Gen. Amin has done a good bit more than proof thousands of individuals, stain his ountry's international standing, and supply white Africa and its sympathizers with a conspicuous and, to them, useful example of plack racism. He has, by ousting the Asians, conqueted an instant and massive social revolution, exporting virtually the entire middle class of Uganda, For it was the asians, of course, who monopolized the comnergial and professional life of the fledgling East African state for years past.

Gen, Amin knows this better than myone. That's exactly why he decided to

Africans to take over the shops, the offices, the houses, the bank accounts, the status of the Asians forced to flee. There are far from enough Africans in place or in training to take over these key economic positions. In the distribution of them, no little corruption and dislocation is already substantial: The 40,000 African employees of the dispossessed Asians, for instance, are now by and large jobless. One wonders if the Ugandans' rejoicing in their acquisition of the sooils will survive their eventual realization of the damage they have done to themselves. It is a strange way to "develop."

Most of the uprooted Asians, having British passports, have been taken in by Britain, which, under the circumstances, is doing a creditable job trying to absorb them. Other European countries and Commonwealth members have taken some Asians: the United States accepted a few hundred. So many people, so many clans and groups, have been torn from their "homelands" in this century, and before. It is a deep misfortune that Gen. Amin has seen fit to add. cruelly, to their numbers.

MASHINGTON, D.C.—The Canadian officials PARIS—Frantic 11th-hour efforts to induce the French Senate to accord the ballot to women by calling in famous suffragist experts at a mass meeting last night at the Sorbonne now seem to have been in vain. Mrs. Carrie Chanman Catt was unable to arrive in time, but other noted speakers lauded womanhood and equality of the ballot. But after the Senate again shelved the bill, it seems the time is not yet ripe for this action in France.

U.S. Position on Uganda: A Cloaked Conflict

By Jim Hoagland

KAMPALA, Uganda.—Although the U.S. election has passed, an apparent pre-election attempt by the Nixon administration to deceive the American public continues to have impact in the deeply troubled East African

The effort involved a decision by the State Department to cloak its intentions to continue financial aid to the regime of President Idi Amin in the wake of Amin's sympathetic mention of Hitler's methods of dealing with Jews after the Munich massacre

While instructing its spokes-man, Charles W. Bray, to tell newsmen in Washington that a development loan to Uganda was being held up as a result of American displeasure with Amin, the department cabled instructions to American Ambassador Thomas P. Melady in Kampala to tell Amin that there was no connection between technical delays that had developed with the loan and his

Ignored Plea

After Amin ignored Melady's plea that this assurance should be kept secret and released it through the Uganda press, Bray evaded direct comment on the conflicting American positions in Washington and Kampala.

But the election is over now and the impact of Jewish votes on foreign policy may have lessened. The United States is clearly pushing ahead with plans to provide more than \$6 million in aid to Amin's government, which has shown no sign of responding to any American attempts to moderate Amin's nation-destroying excesses.

Moreover, the aid is being channeled to a government that with every passing day appears to be less able to provide its share of the money and government manpower needed to administer aid

Amin has allowed his army to slaughter off thousands of soldiers from tribes antagonistic to his rule and has apparently encouraged his security forces to eliminate many of the country's best educated men, whom he feared as a threat. The death toll since Amin took power in 1971 includes three

Government ministers and civil servants, whom Amin publicly ridiculed last week as "weak" and 'iddle," now refuse to make even minor decisions for fear of attracting the general's attention

tic, away from European sophis-

and losing either their jobs or ing aid the United States will The two loans the United States is on the verge of formally awarding to Uganda are for building teacher training institutes and for an animal husbandry project. The fact that they are relatively small does little to mitigate their psychological importance, especially in a time when aid is hard to come by in general and especially in Africa, where a number of other governments have shown themselves capable of adminis-

tering such loans diligently. The loans will also follow a statement by Amin last week praising the Palestinians for the intelligence they have shown in hijacking planes. The United States, which has put itself at the forefront of the campaign against international terrorism, has not taken note of the new Amin

One of the two principal arguments that emerge from discussions with those here who support going ahead with the loans are that they were originally offered several years ago, before Amin ousted President Milton Obote.

There is a "moral obligation" on the part of the United States to go ahead with the aid, this argument holds. Only a few minor technical details of signing the loans have been delaying

have more influence with Amin and be in a better position to protect the 700 or so American diplomats, aid technicians, missionaries and businessmen who have staved on in Uganda.

The implication of this argument is that it might be dangerous to displease Amin by stopping the loans. The Americans who have chosen to stay on are, in effect, hostages.

Britain, which currently has about 3,500 citizens living in Uganda (more than 4,000 Britons have quietly filtered out of the country in the past few months), uses the same argument for its attempts to stay on good terms with the erratic Amin.

Amin is set to take over the tea estates of 28 British farmers in the Fort Portal area of Uganda next week. The clear signs here are that Britain has decided not to make an issue of this, even if Amin offers little or no compensation, as he did not to the 42,000 Asians he has just expelled.

While publicly hinting that its policy toward Amin is based on fear for its nationals still there, Britain is known to have conveyed to the United States its private view that any possible alternatives to Amin are so much more frightening that the West should continue to try to work

The alternatives presumably are

soldiers in the ranks below Amin, who appear to be the only force capable of ending his rule.

This is perhaps, more than any other single factor, the crux of the matter. For all of his erratic behavior and vitriolic words on the Middle East, Amin has not struck at strategic Western in-terests in Uganda, which because of its proximity to Kenya and Zaire and to the Nile is a strategic country, by African policy

standards. Two aid loans will probably have little effect in protecting the 300 American missionaries who undoubtedly will want to see their missions through under even highly dangerous conditions from Amin's violent soldiers. But they could help protect a broader political interest.

Diplomats in East Africa already talk of the danger of the new interest shown in Uganda by Somalia, a major Russian aid

Just as South Africa and Rhodesia have profited politically from Amin's irresponsibility, there will be American political forces that will want to deny American aid and support to Amin because his is a black government. But there are far more compelling and valid reasons for a re-examination of a policy, of eagerly providing loans that will give a boost to a man who has engineer-

U.S. Neutrality on the Rhine

By C. L. Sulzberger 🕛

BONN-All sides agree that the United States is completely neutral in next Sunday's West German elections. Helmut Schmidt, finance and economics minister in the Social Democratic coalition fighting to hold power, adds the interesting comment that Washington only became impartial in this country's politics after President Nixon's inauguration in 1969.

This is less a shift in White House attitudes than an accident in time, Until the Social Democrats, now headed by Chancellor Willy Brandt, drafted their Godesberg program in 1959, their outlook was much more left-wing socialist than now. Among other things it opposed NATO. Since this was a keystone in U.S. policy Washington felt pushed into the

vative Christian Democrats here. But Social Democratic leaders, dismayed by years in the political desert of failure, realized they had to shed their party's vestigial Marrism and adopt a mild reform program, accepting a market economy, if they were to make headway with middle-class voters. This was done 13 years ago and sults only gradually became evident In 1965 the State Depart. ment was still happy to see the

Premature Move

the last national election

Christian Democrats win, But

neutrality was the word by 1969

Although Nixon unfortunately cabled Christian Democratic Chancellor Kiesinger congratulating him prematurely on a "victory" that never materialized in the 1969 cliffhanger, there is no doubt Washington was wholly unprejudiced then, It no longer considered the Social Democrats inimical to U.S. interests. Moreover it had respect and affection for Brandt, the hero of West Berlin where he was a famous mayor.

Indeed today, when the election primarily being fought on men rather than issues, Brandt has a sentimental advantage in America where he is popular, regarded as immensely charismatic, and is helped by his excellent command of English, His Christian Democratic challenger, Rainer Barzel, is less well-known, speaks less good English and has a less striking personality.

The United States—quite apart from its increasingly pronounced distaste for intervening in the affairs of other nations—feels it can work easily with whichever party leads Bonn's next government. It has been dealing happily with Brandt for three years and he and Nixon have a good rapport, liking to joke about their respectively unsuccessful early tries for of-

It endorses the normalization West German relationships with the Eastern neighbors, while recognizing that like any new policy, Brandt's Ostpolitik contains possible hazards. But it feels that it can collaborate couelly with a Barzel government, Neither Brandt nor Barzel would help American farmers by asking the European Common Market to ease its restrictive common agricultural policy. Such an idea is politically dangerous here.

In the event of a Barzel victory, it is not felt that the treaty between West and East Germany (initialed but neither signed nor ratified) would be indefinitely delayed. Pressures for accommodation between the ideological halves of Europe are seen as overpowering, Anyway, neither Wash-

pro-NATO camp of the conser- ington nor Moscow would permit any third capital to obstruct their present desire to work with each

other.

Schmidt, who voices the oninion of the Social Democratic leadership and its small liberal coalition partner, thinks that on the personality issue the United States would, in its heart of hearts, prefer a Brandt victory just the way we preferred a Nixon victory in your recent election. His foreign and military policies were predictable along lines acceptable to us. We could reckon with him, and he can reckon with us."

But this is a human foible rather than a policy. Barzel is the first to stress the present neutrality of an American ally which for years clearly preferred Christian Democratic victories here. He told me: "I believe the U.S. government and the White House are absolutely impartial now.

"Of course Brandt is better known to the American public than I am and this is in a sense my disadvantage. But I believe it is well known that I sit where Chancellor Adenauer used to sit in a policy sense, and that we still have a clear Western predi-

I asked Barzel if he thought Nixon's recent triumph at the polls would, as a possible token of conservatism, be in any way reflected in Sunday's vote by a boost in the strength of moderate German right. "Not at all," he said. "All Germans consider your presidency is beyond and above party." This may ring strangely in American cars.

Because of an error in transmission, the second paragraph of C.L. Sulzberger's column CHT, Nov. 15) read incorrectly. should have read that the United States "cannot lead even the West alone as it once did" instead of "cannot leave even the West no objections to subsidizing alone."

Facing the **Democrats**

Problems

By Wm. F. Buckley ir.

NEW YORK-Moderate Democrais are taking satisfaction from the proposed liquidation of Mrs. Jean Westwood, whose fouryear plan ended in Democratic disester. Eight years ago the Republicans went through the same kind of thing, with regular calling for the ouster of Dear Burch, who was closely identified with candidate Barry Goldwater and therefore with the great Goldwater defeat. Mrs. West. wood says she intends to stay on, that they will have to our her if they want to get rid of her, and that probably they don't have the votes to do it with Dean Burch did not fight pub. licly, but Goldwater loyalists were certain they could hang on to him if Barry Goldwater stood by He chose not to, for complicated

It isn't known whether George McGovern will enter now into that listless period characteristic Stevenson went into relative in the hiding, issuing only one or two bolletristic missiles to his supporters. Richard Nixon, in 1960, became almost a recluse for a period of months. Hubert Hum. phrcy went an entire fortnight or so the hyperbole goes, without giving a speech. George McGovern's behavior is not absolutely predictable, and we cannot know whether he will fight to retain Mrs. Westwood, as the only living survivor of the climacteric of last July in Miami

In Happy Stride

Those of us who are in no particular hurry to see the Democratic party repair itself should be prepared to take in happy stride Mrs. Westwood's victory, if in fact she prevails. Her dismissal, after all, would be nothing more than a ritual execution another agricultural commissar sent to Siberia, unrelated to the prospective emancipation of the kulaks. The only thing the Democratic party could do to appease American anxiety is torepudiate not Mrs. Westwood, nor even George McCovern, but 5 1971 McGovernism. It is not at all clear that the party will do this, y the however. Although the kindergarten forms of socialism were mostly repudiated by the social democratic parties of Western Europe after their postwar binges with nationalization, on the whole, and notwithstanding the formal rejection of Karl Marx in the late 1950s by German socialists, they have continued on their way towards state socialism.

The Democratic party has strategic difficulties which are largely the making of the Republican. party. It has, really, no other vision than the socialist's vision. The Republican party, particularly under Richard Nixon, has accepted the notion of federal responsibility for human welfare. It has done so fitfully, in the empirical to the abstract approach, as exemplified by the difference between, say, Elliot Richardson's various publichealth proposals, and Edward Kennedy's.

But you name it, the Republican party is pretty much there: charging government with looking after health, education, old age, child care, recreation. In foreign policy there is no direct ideological line that issues out of existing public differences between Republicans and Democrats. The Come Home America theme of George McGovern got pretty well lost during the campaign, after candidate McGovern was done paying his obeisance to Israel, and to aerospace employees in Texas and California

What the Democratic party needs at the moment, if it is to provide tough opposition for the Republicans, is not less Mc-Governism, but a great deal more of it. More precisely put, it needs McGovernism without Mc-Govern. Drastic redistribution schemes without silly arithmetic Anti-business legislation without opportunistic petulance. In short, a sharp turn towards orthodox, or nec-orthodox, socialism.

The alternative is too diraying to contemplate. It would involve a genuine rediscovery of the ideal of the community, of the primacy of the individual, of the spontanelty of the private sector, A genuine revulsion against over-weaning government. For a government stalled by the Republican co-option of New Deal gradualism, and public hostility towards socialism, one might hope that a new Democratic radical would emerge calling attention to something much more exciting than the replacement of Mrs. Westwood. Perhaps someone will move that Vivien Kellems replace her? A dream, no doubt. But the Democratic party has just finished proving that it has dreams in national campaigns.

But as the station, on the Vakhsh River in the central Asian republic of Tadzhikistan, began to turn out its first power yesterday, construction of its two principal consumers was just getting under way. The situation that has devel-

oped around the Nurek project is typical of the lack of coordination that has bedeviled largescale regional development schemes in this planned economy. Each industrial ministry has turned out to be concerned mainly with its own narrow interests, with little regard for the regional

The lack of coordination first became apparent on a large scale when the big Bratsk hydroelec-tric station of Siberia went into operation in the early 1960s. The construction of big industrial consumers had lagged behind and, for years, the costly power dam discharged water uselessly over its spillway while operating at a fraction of capacity.

Soviet regional planners long have urged institutional reforms to insure better coordination in planning and construction under special regional development agencies using modern managespecial ment techniques, but so far to no avail.

In a recent analysis of the disjointed development of the Tadzhik industrial complex, the newspaper Pravda warned of great losses to the Soviet economy unless the completion of aluminum and chemical production capacities are tied in more closely with

the availability of electric power. "If that is not done," the Communist party daily said, "the hundreds of millions invested in all parts of the complex will turn into a loss of hundreds of millions of rubles." At the Soviet rate of exchange, one ruble is worth

Considering the lag of construction at the two principal consuming plants, Prayda said, both at best will be only halfcompleted when the Nurek generating station reaches its full capacity by 1978.

The Nurek dam, under construction since 1961, will be the world's largest rock-fill dam when it reaches its designed height of 984 feet and a volume of 59 million cubic yards.

Japanese Ship Tows U.S. Cutter

JUNEAU, Alaska, Nov. 16 (AP). The helpless Coast Guard cutter Jarvis was towed to an area of relative safety in Alaska's Aleutian Island chain today by a Japanese trawler, which of-ficials say kept the craft from

being beached by heavy seas. The 378-foot Jarvis, its engine rooms flooded and damaged "fore and aft," was towed to the Sedanka Island inlet after a ninehour ordeal in which its engines were put out of action. A Coast Guard spokesman said

only the arrival of the Koyo Maru No. 3, a 336-foot fishing craft, prevented the Jarvis from being run aground.

ROYAL PRESS CONFERENCE-Danish Queen Margrethe and husband Prince Henrik at press conference

Danish Queen Calls Job 'for Life,' But Welcomes Monarchy Debate

COPENHAGEN. Nov. 16 (AP).—Queen Margrethe II of Denmark today told a historic royal press conference that it is a good thing that the monarchy has come up for debate. but that she has found monarchial life a very rich life and considers it a "job for life."

On the other hand, Prince Henrik, the queen's French-born

consort, admitted that being the monarch's husband was "the hardest job in the world," but that he had come to like it. Switching fluently between Danish, Swedish and English, the 32-year-old queen kept more than 100 newspapermen interested, amused and generally happy with answers for threequarters of an hour at the first press conference ever held

a reigning Danish monarch. The queen and 38-year-old Prince Henrik had no news to break to the nation, or the world, but Queen Margrethe emphasized that had never been the idea.

The purpose of asking the press to Fredensborg Castle, north of Copenhagen, she said, was just to "give back" some of the friendliness she met across the country since she be-came queen upon the death of her father, King Frederik, last

EFTA Meets to Plan Future Without Britain and Denmark

30 Elderly Nuns Ask Texas for **Old-Age Pensions**

HOUSTON, Nov. 16.-In an unusual move 30 elderly nuns in a Dominican teaching order here have asked the State of Texas for

Mother Superior Mary Louise Dolson said that the order is in financial difficulties and that there are too few teaching nuns to support all the elderly retired sisters.

The order is known as the

Dominican Sisters, Congregation of the Sacred Heart, and the mother house, or headquarters, is in Houston. It was founded in Galveston in 1882 and moved to Houston in

1926. There are 267 nuns in the there are many of whom teach. But there are many others who work for no salary. The order is in-dependent of any other Roman Catholic institution and comes directly under the jurisdiction of the Holy See.

Because of this autonomous standing, the order receives no support from the church aside from the teaching salaries—which are a third to half less than what public school teachers are paid. The elderly nuns would receive about \$77 a month each. C Los Angeles Times.

N.Y. City Would End Time Limit on Bars

NEW YORK, NOV. 16 (NYT) -Mayor John V. Lindsay's administration yesterday proposed the ending of all restriction on the hours that New York City taverns may remain open, arguing that this would combat the growing problem of fllegal, after-hours bottle clubs and would have little effect on society's

drinking patterns. The proposal, which has been submitted to the state legislature, would end the present mandate that bers close at 4 a.m. Monday through Saturday and an hour earlier on Sundays.

Poor Readers Found Before Reading Age

U.S. Test to Allow Early Treatment

WASHINGTON, Nov. 16 (AP). _A university researcher said yesterday that he has developed an early warning system that spots children with learning difficulties, even before they enter

If the test holds up under further investigation, said Dr. Paul Satz, of the University of Florida, educators could begin applying remedial measures before youngsters fall behind in reading and writing skills.

"Difficulties in reading can have shattering impact on chil-dren in later years," Dr. Satz said at a news briefing arranged by the U.S. National Institute of Mental Health.

A two-year study of 500 white boys in Alachua County, Fla., tested in 1970 before they entered kindersarten and again at the end of the first grade, correctly predicted reading abilities of 91 percent of the pupils, he said.

The tests correctly classified 100 percent of those with reading handicaps and 95 percent of those with superior skills.

Responsive to Change

"The present findings provide preliminary support and encouragement for remedial intervention approaches at a time before the child begins formal reading at a time when his central nervous system may be more plastic and responsive to change. and at a time when he is more free of the frustrations and emo-tional turnoil associated with repeated academic failure," Dr. Satz said.

Boys were chosen for the study because they are more likely to suffer from dyslexia, or reading disability, Dr. Satz said. Conservative estimates place at least four million U.S. grade school-children in that category, he

Dr. Satz said that he suspects the problem results from a lag in brain development, emphasizing: These children are not braininjured or impaired. They're de-

Reading is probably only a symptom of the developmental lag which affects other learning and motor skills, he said.

U.S. Panel Fears Cancer Increase

Tighter Radiation Safety Standards Urged

By Thomas O'Toole WASHINGTON, Nov. 16 (WP). -A panel convened by the National Academy of Sciences concluded yesterday that federal standards for exposure to radiation must be tightened up if the United States is to avoid an increase in cancer deaths over the

next 30 years. Calling the guidelines for exposure to radiation "unnecessarily high," the academy panel strongly recommended that the federal government re-examine public exposure to X-rays, nuclear medicines and other man-made

sources of radioactivity. A 470-page report released by academy's Advisory Committee on the Biological Effects of Ionizing Radiation offered no alternate radiation guidelines, but declared that current standards "grew out of an effort to balance societal needs against genet-

"It appears that these needs can be met with far lower average exposures," the panel went on, "and lower genetic and somatic risk than permitted by the current Radiation Protection

The committee estimated that if the U.S. population were exposed to the 170 millirems (the amount of radiation in about four chest X-rays) a year of radiation, now considered the maximum to maintain safety standards, anywhere from 1,100 to 27,000 Amer-

icans would become afflicted with serious, genetic-linked diseases. Effects of such exposure to radiation among the entire populace could include an additional 6,000 deaths a year from cancer, the committee said, which would be an increase of 2 percent in the nation's spontaneous cancer death

rate. The committee came down hardest on the growing use of radiation in medicine, which it said made up the largest fraction of the dose from man-made radiation to the public.

'Medical radiation exposure can and should be reduced considerably," the committee concluded. "by limiting its use to clinically indicated procedures utilizing efficient exposure techniques and optimal operation of radiation equipment.

The committee estimated that 129 million people received 210 million radiological examinations in 1970, which it said was an increase of about 2 percent a year since 1964. While the committee agreed that many of these examinations were necessary, it also suggested many were not. Among the procedures the com-

mittee suggested were unnecessary were "mass chest radiography" for lung cancer and possibly tuberculosis, mass radiography for gastric cancer, routine pre-employment radiography for food handlers and possibly mammography screening for breast cancer

"Attention must be directed toradiation dose to the pregnant or potentially pregnant female, the committee said, "as well as to testis shielding in men, since we expect the human male to be much more susceptible to radiation-induced mutation than the human female.

DANCE IN LONDON

Jerome Robbins at a Gala

By Oleg Kerensky

ONDON, Nov. 16 (IHT),—The Royal Ballet's annual gala performance at Covent Garden lest night was a big success, despite rather than because of the British premiere of Jerome Robbins's latest Stravinsky ballet, "Requiem Canticles."

Whatever one thinks of this austers music and the jerky, self-conscious movements Robbins has set to it, it certainly is not gais material. Some people found it moving. The word "masterpiece" has even been used and a difficult new work by Robbins brings the Royal Ballet a sort of prestice. Personally I wish we could have had his "Goldberg Variations" or "Water-

mill," both of which aroused much more enthusiasm in New York.

"Requiem Capticles" is one of the innumerable new works singed by the New York City Ballet for its Stravinsky week in June. It uses a corps of 15 dancers in black practice dress, varied by different amounts of decolletage, four sololsts whose black is relieved by varied patches of mauve and two singers and the opers charus, with the orchestra in the oit. Mostly the dancers form groups, jerking their arms and hands at odd angles, shuffling along the floor in kneeling positions, or standing in fear with their mouths open at the end. I was reminded of some of Balanchine's more modern works, and even of Anna Sokolow. Obviously Robbins intended to be spiritual and profound: For some people he may have succeeded. I prefer him when he is being entertaining, poetic or theatri-

Ashion Work

Anyone who thought that the distinctly muted reception given to "Requiem Canticles" was simply the result of expensive seats and a smart audience was speedily disabused by the ecstatic ovation given to Sir Frederick Ashton's "The Walk to the Paradise Garden," which followed the

Italy Headed for **Record-Breaking** Year in Tourism

ROME. Nov 16 (AP).-Tourism, Italy's biggest industry and foreign exchange winner, appears to be headed for a record year in 1972 despite complaints about strikes, pollution, noise and rising prices.

Vittorio Badini Confalonieri, minister for tourism and entertainment, said yesterday that a record 10.1 million foreign visitors entered the country in the first eight months of the year. That was a 4.2 percent increase over the same period of 1971. Receipts from tourism rose

almost 16 percent, to 865 billion lire or \$1,490 million from less than 748 billion lire in the first eight months last year.

Robbins. It wasn't just delight that Ashton is back at the Royal Opera house, even if only for a short cala item: It was also appreciation of a work which is similar to three of the Royal Ballet's most recent works-Ashton's own "Siesta," Macmilian's "Ballade" and Hynd's "A Walk by the River"-but infinitely

superior to any of them. The new work has the advantage of Merle Park and Da id Wall, both marvelous dancers, and of a very attractive and ingenious abstract décor by William Chappell. It starts with two lovers on the ground in the sun, it moves through a series of rhapsodic jumps and liftseffortlessly performed—and ends with a sudden transformation scene and the lovers finding themselves enveloped in the cloak of death. The program note describes Delius's music as an orchestral "Liebestod" for doomed lovers and that is precisely what Ashton has translated into visual terms.

The gala also featured the guest appearance of Natalia Makarova in "Les Sylphides" and the "Don Quizote" pas de deux, and a revival of Ashton's "Birthday Offering" with a cast headed by Margot Fonteyn. Makarova was light and romantically stylish in "Sylphides," helped by the partnering of Anthony Dowell, but not by rather pedestrian orchestra playing. She was minningly carefree and vampish in "Don Quixote," balancing hrilliantly and scaring into the air in jetés and in some exciting one-handed lifts on the arm of the admirable Donald MacLeary. The Royal Ballet has no ballering who can rival such strong nersonality, versatility and reliability. Any internal jealousies must be overcome to enable Makarova. who is leaving the States to ettle in London, to dance here regu-

Fonteyn no longer finds the quick steps of her solo in "Birthday Offering" as easy as she once did, but she is still unrivalled in the pas de deux and in the charm and dignity with which she leads the team. A cast including Antoinette Sibley, Merle Park, Ann Jenner and the very welcome return of Svetlana Berlosova, supported by David Wall, Anthony Dowell, Michael Coleman and Donald MacLeary, ensured that the ballet glittered as it

Both "Paredise Garden" and "Birthday Offering" are far too good to be dropped after this solitary gala outing: They must speedily be seized to provide much-needed yeast for the Royal Ballet's regular repertoire.

LES 12 OEUVRES D'ART LES PLUS RECHERCHÉES THE 12 MOST WANTED WORKS OF ART

Notice publice par l'O.I.F.C. INTERPOL 26 Rue Armengaud, 92, Saint Cloud (France)

Entertainment in New York.

NEW YORK, Nov. 16 (IET).-This is how The New York Times reviewers rate the new

"Black Girl," adapted by J. E. Franklin from her 1971 Off-Broadway play about Billie Jean, a high school dropout and aspir-ing ballet dancer who lives at home in a Southern suburb with her mother, Mama Rosie, her two half-sisters, her grandmother, and s "mild-mannered" man named Herbert, got a assative review from Roger Greenspun. "Not having seen the play, I don't know how much has been lost in the transition," Greenspun writes.
"But I suspect that the real dif-ference between the successful play and the falled movie lies in Ossle Davis's direction, which ranges from pedestrian to down-right helpless. Sloppy editing, awkward confrontations, dull and obvious camera technique-all are the director's responsibility. You can almost feel the actors asking for stage management. They don't get it—and that, in a work not without some interest, seems a pity." Some of the acting is very good, according to Green-spun. Notably, Peggy Pettitt, a newcomer, as a "quite complicated" Billie Jean,

"1776," directed by Peter Hunt, screenplay by Peter Stone, adapted from his Broadway musical play based on a conception by Sherman Edwards, won reluctant praise from Vincent Canby. "The music is resolutely unmemorable. The lyrics sound as if they'd been written by someone high on root beer, and the book is familiar history-compressed here, stretched there—that has been gagged up and paced to Broadway's not in-

the Smithsonian Institution two goods was begun in Florence by years ago. Gucci, which accounts for the GGs that Gucci by Mrs. Nixon, was for the are on every bit of merchandise, from ties to luggage. The ismous green and red webbing, another Gucci signature, were the colors of the Gucci stable.

Originally dealing in just higgage, Gucci branched out into shoes with a simple but perfect moccasin that became an international best seller. Then six years ago, with another of Aldo's sons, Paolo, in charge of designing, the firm went into fashion with skirts, pants, blouses, rain-

In all cases, the design is very simple, but both the quality of the skins and fabrics and the eye for detail put their clothes up in the lap-of-luxury class. Raincoat buttons, for instance, are handsomely mameled and circled with teak. Suede come with gold-plated

DJ).—The Bundesbank warned policy could fail if it is not supported by a similarly restrictive economic and fiscal policy.

In the latest monthly report, the central bank questioned whether current budget plans for 1973 of federal, state and community authorities are already adjusted to the need of regaining stability.

"It appears unavoidable," the Bundesbank said, that these

Japan Bank To Maintain **Neutral Policy**

TOKYO, Nov. 16 (AP-DJ) .-The Bank of Japan has no intention of changing its "neutral" policy of neither belging to create nor to restrain the growth of liquidity despite accelerating rises in wholesale prices, Tadashi Sasaki, the central bank's governor. said today.

His comments, to a convention of regional bankers, were mainly are no restrictions on bank participations in ot banks other than the reiteration of recent similar statements. As in the past, the statements reflected the bank's ccepting houses consist of growing frustration over being tigious merchant banks. unable to deviate from its present me derives from the fact credit policies despite changing by once specialized in aconomic circumstances, largely bills of exchange, albecause of domestic political con-

siderations. At a press conference, Mr. Sasaki labeled spiralling wholesale prices as "a constant source of concern." but he said October's 1 percent rise in the price index from September did not surprise

the bank. The bank is in "a tight spot" in trying to maintain what is entially an easy-money policy in the face of rising prices, Mr. Sasaki said. But he said the price problem cannot be solved by monetary action alone. The governor said other measures, such as import decontrol, must

be put into effect. That line of argument did not draw a favorable response from the Ministry of International Trade and Industry (MITI), how-

MITI_officials_concluded_that inflation overseas and rising prices for some raw materials such as wool, are putting upward pressure on Japanese prices, rather than relieving inflationary

Earlier this autumn, Mr. Sasaki Indicated several times that the Bank of Japan would have liked to switch to a more restrictive credit policy, but this idea was vetoed by the Tanaka administration. Japan's political leaders have just dissolved the lower house of the Diet in preparation for a general election next month They are simultaneously attempting to deal with a persistent vir-plus in the balance of payments. Easy money is regarded as necessary to contend with both

situations. Mr. Sasaki said that despite recent price increases, he does not think an inflationary psychology has established itself in Japan. There is still plenty of industrial capacity available to meet grow-

unlike that of the past, of rising

at a faster rate than the pace of expansion in the economy."

This announcement is neither an offer to sell nor the solicitation of an offer to buy

any of these securities. The offering is made only by the Prospectus.

export trade control ordiing demand, he said. association said. Not So Optimistic sources said motor Other observers are not as opports, including trucks, d auto parts as well as timistic, however. Mitsubish Bank, in its monthly review for cars, during the one November, said that its economists believe that an increasing gap August 1973, would be about \$3.75 billion with \$3 billion in the between Japanese wage increas and productivity advances indicates that wholesale prices "are owdown in auto exports starting to assume a character if art of the government's

FRANKFURT, Nov. 16 (AP- budget plans drafted in the summer and early fall will have to today that its restrictive credit be revised in line with a more restrictive policy."

In face of a consumer price rise in October of 6.4 percent from a year earlier, all efforts must be aimed at speedily cutting price rises. Otherwise, the bank warned inflationary trends will be accelerated.

The bank said its Nov, 2 decision to raise both the discount and the Lombard rate were moves in the right direction.

"But," it added, these measures would "nitimately remain without success unless they are supported by similar measures in the areas economic and fiscal policy."

Economic Upswing The latest economic indicators show, the bank said, that in line with a moderate economic up-swing and high utilization of all available production factors, the upward trend of prices accel-

The major impetus for this economic upswing comes from private consumption and demand for new homes as well as from increased foreign orders received

by industry, the bank said. While the growth rate in capital spending by domestic industry remains at a slow pace, the bank said, current 1973 projections point to considerably higher ex-

penditures next year. Several corporations seem to face the problem of not being able to raise production with the labor force at their disposal, the Bundesbank said.

Requests from firms for more workers at government labor offices increased considerably in September and October, the bank reported. The number of unemployed persons, small in itself, amounts to only one-third of the number of jobs available, it noted. Rarely, the bank added, can corporations fill vacancies with those persons registered as jobless. More foreign workers must be

brought in, the bank said. It also reported that the sea-sonally-adjusted industrial order inflow in September rose 1 percent from both August and July and was up 5.5 percent from a year earlier.
Industrial production, season-

ally-adjusted and excluding the bullding industry, was 2 percent higher in September than in August and July and rose nearly 4 percent from a year earlier. Seasonally-adjusted, the jobless

rate was 1.3 percent in October, down from 1.4 percent in September, but up from 1.1 percent

hiring additional workers in several of our plants in West

Germany," Mr. Leiding said.

output by rbout 200,000 units.

FTC Opposes Pepsico Bid

The Federal Trade Commission has challenged the proposed acquisition of Rheingold Corp. by Pensico Inc. contending that it might substantially lessen competition in the soft-drink industry. The commission issued a complaint alleging possible violation of anti-trust laws and docketed the case for trial starting Jan. 3 before an administrative law judge. The commission took no action to prevent Pensico's continued acquisition of Rheingold stock, under way since Oct. 25. Instead the commission instructed its legal staff to seek a court injunction prohibiting Pepsico from taking any other action that would make it difficult or impossible for the merger to be dissolved later. The complaint is concerned mainly with a potential monopoly of the market for soft-drink concentrates—the "syrup" to which carbonated or plain water is added to make the beverage. Pepsico and six other large companies accounted for 84 percent of the \$450 million in total concentrates sales in 1971. Rheingold moved into the field in 1970

Marion May Merge With R&D Firm

Marion Laboratories Inc. has entered into preliminary negotiations to acquire Alea Corp., which is engaged in research and development of pharmaceutical products in which drugs are in new types of dosege forms called therapeutic systems. The transaction is subject to the negotiation of a mutually satisfactory agreement, approval of the boards of directors of both companies and stockholder approvals. The therapeutic systems

Stay with people who care.

Hilton International.

At the Madeira Hilton you'll have sunshine from sunup to sundown and no end of things to do under it. Swim, play tennis, explore the mountains and nearby Funchal.

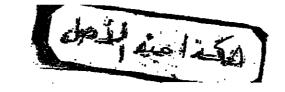

The Malta Hilton has all the pleasures and relaxation of a great resort hotel. And complete business and meeting facilities to tempt you to mix pleasure with business. FOR RESERVATIONS CALL YOUR TRAVEL AGENT, ANY HILTON HOTEL OR HILTON RESERVATION SERVICE IN PARIS; 720-3012. IN FRANKFURT: 28-16-33. IN LONDON: (01) 493-8888. IN GENEVA: (022) 32-05-56.

The Marbella Hilton was built for pleasure. Sandy beach, pool, fine restaurants with live flamenco and a year-around activities program. Golf nearby.

The Rabat Hilton offers modern comfort and convenience in Morocco's ancient capital, Robert Trent Jones Royal Golf Course, minutes away.

The Tunis Hilton has a resort atmosphere, five minutes from the center of this historic city. Visit Roman ruins and the 9th-century Great Mosque. Free bus service to the beach.

EEC membership next year and the best tax concessions in Europe will attract even more industries to Ireland.

Already many European firms have set up or re-located in the Irish Republic. They enjoy many advantages, not the least being full exemption from taxes on export profits for fifteen years. In the EEC, Ireland's tax incentives will remain the best in Europe, with duty-free entry to a market of 260 million (60 million of them right next door). Other benefits:

Workers. Excellent production workers immediately available, intelligent, keen and easy to train.

Grants. For sites, buildings and new plant, for training workers, for research and development.

Factory Buildings. Modern factories with full facilities are available at favourable rents.

Transportation. Excellent uncrowded highways. Container service to British and Continental ports, Immediate access by air to world markets.

For complete information on all aspects of setting up industry in Ireland call Niall Mooney at Paris 256 00-49 or John O'Sullivan at Cologne (0221) 37 31 00 or Eoin O'Sullivan at London 01-629 4214.

Un'ess otherwise noted, rates of dividends in the foresoing table are entual disbursements based on the last
quarterly or semi-annual declaration. Special or extra
dividends or payments not designated as regular are
identified in the following footnets. switches or payments not designated as regular are identified in the following footners.

a—A'to e-fra or extras, b—Annual rate plus stock dividend, r—Liquidating dividend, d—Declared or paid in precising 12 monits. (—Paid in stock during 1971, astimated cash value or ex-dividend or e-distribution care, h—Declared or paid after stock dividend or split up. k—Declared or paid this year, an accuputative issue with dividends in arrears. n—New issue, p—Paid this year, dividend errifited, deferred or no action taken at last dividend errifited, deferred or no action taken at last dividend meeting, r—Declared or paid in 1972 plus stock dividend errifited, deferred or no action taken at last dividend, r—Paid in stock during 1972, estimated cash value on ex-dividend or ea-distribution date.

cid—Called x—Ex dividend, y—Ex dividend and seles in full, adip—Ex distribution, x—Ex rights, xx—:Without warrants, xw—With warrants, wd—When distributed, wi—When issued, nd—Near day delivery.

vi—In barkruptcy or receivership or being reorganized under the Bonkruptcy or, or securities assumed by such Companies, fm—Foreign issue subject to interest equalization tax.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only. Business. The business community

throughout Europe relies on the Herald Tribune for essential world-wide business news. Day after day.

The following are extracts from the mual statement to shareholders, dated October 20,1972, by the Chairman of Roan Consolidated Mines Limited, Mc Dominic C. Mulaisho

London

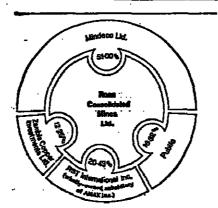

The year which ended on 30 June has seen continued progress by RCM in its expansion projects and in the rehabilitation of Mufulira mine. Total mine production increased by over 9 000 tonnes of recoverable copper compared with the previous year despite mining problems at conditions. Finished copper production was, however, adversely affected by a temporary shut-down of the Mufulira electric furnace resulting from damage by fire, and this, together with the need to build up process stocks, caused a slight fall in saleable production. In the field of industrial relations, I am

glad to report that co-operation between employees and management has been excellent. In the past year RCM's operations were not interrupted as the result of any industrial dispute. On the other hand, losses of experienced and skilled employees and difficulties in recruiting replacements for them are a continuing cause for concern. In the financial field, it is encouraging

that a number of international loans have been negotiated towards the company's expansion programme. However, the continuing low level of copper prices in the face of rising costs has been disappointing. There have been some signs of a resurgence of industrial activity in the world, and it is to be hoped that this trend will continue and bring about a rise in the price of copper to healthier levels.

PRODUCTION AND SALES Mine recoverable production of copper was over 9 000 tonnes higher than in the previous year, as shown in the figures below for each mine:

ne production Mufulira Luanshya Chibuluma Chambishi Kalengwa	1971/72 96.352 84.158 25.803 35.417 12.868	1970/71 75 344 101 790 24 681 32 797 10 466
_	254 398	245 078

Finished copper production at 242 790 tonnes was lower than last year's 250 355 tonnes because of the increase in overall process stocks caused partly by smelter problems and partly by the increasing production rate.

At Luanshya, production was substantially lower due to mining difficulties, but at all the other mines there was an improvement With the continuing recovery at Mufulira, a further rise in company production is expected in the 1972/73 financial year. The year's sales amounted to 242 475 tonnes. A continual review of the stocks in transit between refineries and customers

ensured that these stocks were maintained at the lowest possible level.

FINANCIAL

Sales revenue for the year included K185.6 million (K766 per tonne) from the sale of copper compared with the previous year's K212.1 million (K822 per tonne). Revenue from the sale of by-products was K5.1 million (K6.6 million). The cost of sales of copper was K136.7 million (K564 per tonne) compared with the previous year's K133.8 million (K519 per tonne). The net after-tax profit of the company

was K43.6 million out of which K12 million has been transferred to a reserve for capital expenditure, KO.6 million to debenture stock redemption reserve and K10.5 million to general reserve. The balance of K20.5 million has been made available for distribution to shareholders.

Four quarterly dividends amounting in all to K1.23 gross per share (K0,6765 net after tax) were declared, representing 47 per cent of the net profit. The dividends were affected by the heavy capital expenditure on the Chambishi and Bajuba expansion programmes which are being partly financed from retained profits. The total cost of these projects is now estimated at about K80 million.

To help finance these projects and other large capital expenditures, medium and ong-term loans amounting to K27 million have been negotiated. In addition, credit facilities have been negotiated against overseas equipment purchases and contractor costs amounting to about K35 million, and overseas acceptance credit facilities have been established amounting to about K18 million.

In December Zambia's currency was fied to the US dollar instead of to sterling, constituting a devaluation in relation to sterling and some other currencies.
Following the "floating" of sterling in June, the Kwacha, which has a parity of US \$1.40, was worth £0.58 at the time of

COPPER MARKET

Copper prices fluctuated less than in recent years. The year's average RCM price, which is still based on the London Metal Exchange cash wirebar price, was about K768 per tonne, and monthly averages ranged from about K697 in November 1971 to about K828 in March 1972. Prices have fallen again since March. and at the time of writing are in the region of K740 per tonne. The statistical balance between copper

supply and demand has remained one of surplus, but the size of the surplus seems to be modest. LME stocks rose during the year from about 100 000 tonnes to 158 000 tonnes at the end of June and have since risen to 173 000 tonnes in early October, However, both consumer and producer stocks are low Although the United States economy has recovered noticeably, the performances of the European and Japanese economies, and consequently their copper consumption, have been disappointing.

OPERATIONS

Mufulira Division Good progress has been made on rehabilitation of the mine. A great deal of mud has been removed from the mine workings and many items of equipment have been recovered, renovated and brought back into service. Specialized equipment for pumping mud from the lower parts of the Peterson shafts system has now been installed and is being commissioned. Once desludging of the Peterson shafts has reached the 826m level, work will begin on the rehabilitation of the main pump station there to replace the present temporary installations with permanent pumping equipment. All three shafts of the

Peterson system were re-commissioned during the year down to the 810m level.
With the re-establishment of access between the Peterson and No. 14 shafts on the 810m level, work has restarted on the construction of the lower loading complex at No. 14 shaft.

Mine production is now running at approximately 10 000 tonnes of copper per month and is expected to increase to about 12 000 tonnes by June 1973. The rate of increase will depend very much on the success of the introduction of mining methods incorporating sandfill. At the refinery, No. 4 tankhouse was commissioned ahead of schedule in August using conventional direct current

to provide additional toll refining capacity. Electrical equipment for conversion to periodic current reversal will arrive later this year, Mufulira has carried out considerable development work on the periodic current reversal technique of electrolytic refining and this shows that remaing capacity can be significantly increased at low capital cost without loss of copper quality. Some other copper-producing countries are showing interest. in benefiting from our work.

Other

Luanshya Division During the year difficulties were experienced in underground mining operations and these problems are likely to continue. Mineralization has shown unexpected irregularity in the areas west of MacLaren shaft and ground conditions in several areas have been poor resulting in a slower rate of mining and increased dilution. Work on the Baluba section has continued at a satisfactory rate. No. 1 shaft has been commissioned and the service ramp has been connected with the 120m level. The new surface railway to transport ore to the Luanshya concentrator has been completed and construction of the concentrator extension is well advanced. Production from the Baluba section is expected to begin in January 1973 and gradually to increase until an annual rate of about 22 000 tonnes of copper is achieved.

Chibuluma Division Exploration to prove possible extensions to the Chibuluma West orebody has been intensified during the past year initial results are encouraging but it is still too early to say whether enough extra ore will be found to add significantly to the reserves of this small but high-grade mine.

The development of underground mining at Chambishi and the associated extension to the Chambishi concentrator has continued throughout the year, No. 3 shaft, due for commissioning in the latter part of 1975, has now reached a depth of just over 260 metres. Progress in this shaft has been disappointing but every effort is being made to increase the rate of sinking and present indications are that ground and other conditions are good. Construction of the extension to the concentrator is well advanced and it is expected to be commissioned during the second half of 1973.

Operations of Malangua have continued at its factorily and the 400-billion etre access road on which ore and concentrates are transported to the Copperbelt has been well maintained by the Zambian

INDUSTRIAL RELATIONS

Industrial relations continue to be good and no time has been lost through disputes since May 1971. This situation is in part due. to the settlement of disputes at the lowest possible level and to more efficient of joint consultation and briefing groups. Relationships with the Mineworkers' Union of Zambia at both head office and branch level have been cordial and contacts frequent.

During the year we joined with Mindsco and Nchanga Consolidated Copper Mines Limited in establishing a unit to co-ordinate Zambienization, training and manpower planning on an industry basis. We are confident that this unit will record notable. achievements in speeding the pace of Zembianization, an objective which naturally, we wholeheartedly support. Alt our mines have been reducing their expatriate staff steadily as Zambianization proceeds through the industry and economy is being exercised in the use of our small cadre of skilled and experienced employees, Zambian and expatriats, in the production and training functions. The stabilization of the Zambian work force has been a notable feature of recent years and I hope that we shall be successful in measures to reduce the turnover among expatriate employees.

CONCLUSION

The progress made in the rehabilitation of Mufulira is encouraging but much remains to be done. It is still too early to make firm predictions of output in future years, for much will depend on the succe sandfill mining methods now being introduced. However, it is hoped to approach the pre-accident rate of 165 000; tonnes a year by mid-1974.

In addition to increased production arising from the rehabilitation of Mufulina, the development of the Baluba section of Luenshya and of the underground operations at Chambishi will add 22 000 and 24 000 tonnes a year respectively to the company's capacity. Taken together, it is expected that by 1975 RCM's production? will be of the order of 370 000 tonnes a

Although there is continuing evidence of a surplus of supply over demand, I see na reason to alter the opinion I expressed a year ago that we should look to the long-term trends in world consumption of copper rather than the short-term

fluctuations of the market. It is with this in mind that production in Zambia is being expanded as quickly as possible.

I should like to convey my personal thanks and appreciation to all those who in their different ways have contributed loyally and willingly to the prosperity and progress of the company and Zambia.

Roan Consolidated Mines Limited is incorporated in Zambia. Copies of the fulf text of the Chairman's statement, together with copies of the annual report and accounts, can be obtained from its London representatives, the Secretary, RST

BRIDGE,

By Alan Truscott

ficulty if he had passed originally, but he chose to make a sub-minimum bid of one diamond. North had visions of slam, and made a series of exploratory moves as shown in the diagram. He finally gave up at five diamonds in the face of strong discouragement, but the partnership had reached a precarious

The opening lead by West was the heart eight, responding to his partner's lead-directing double of North's four-heart cuebid. South ducked in dummy, and East overtook with the nine and returned the queen.

North won the second heart trick, and led to the diamond ace. He returned to dummy with a club lead and took the diamond finesse, losing to West's queen. West then seized his opportunity, playing a club and so removing a vital entry to the dummy. From that point there was no way to develop more than ten tricks, and the contract was one down. If the declarer had taken the

trump finesse immediately at the

NORTH

▲ KQ73 ♥ A104 ♦ J97 AAK6 EAST (D) **4** 10652 **▲** J94 ♥ KQJ92 Ø 83 ♦ 053 ♣ 01075 SOUTH J42 ♦ AK 1942 983

North and South were vulnerable. The bidding: East South West North 1 ♦ 2 ♦ Pass Pass Pass Pass 3 ♠ Pass Pass Pass Pass Pass Pass Pass West led the heart eight

South would have had no dif- third trick, neglecting the remote chance of a singleton queen with West, he would have made the contract. It would not matter what return West made after winning the queen, but assume a club. South would have won in dummy, drawn one more round of trumps and cashed three spade winners throwing a club. In doing this he would have to take the chance that East had begun with three diamonds and only two

> Once three rounds of spades survived South would have cashed two more rounds of trumps ending with the lead in his own hand in the following position: North

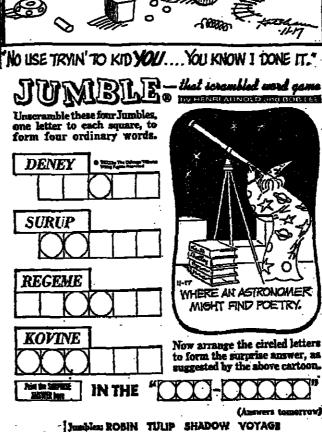

> > West East **★** 10 South

Now the lead of the last trump would have executed a classical double squeeze. West would have to keep his spade winner and would throw a club. Dummy's spade would be thrown, and East would be helpless.

THE CAMERONS

By Robert Crichton, Knopf. 509 pp. \$7.95.

Reviewed by Christopher Lehmann-Haupt

"The Camerons"—when Mag- good, we think. gie Drum awakes in the dark, cold, still world from which she is so determined to escape—you can see that Robert Crichton. the author of "The Secret of Santa Vittoria," knows exactly what he is doing. Sure, it's been done a thousand times beforethe story of the poor girl trying to rise in the world by dint of hard work and a shrewd marriage. Sure, it all sounds familiar-from the hoard of money buried beneath the cottage floor to the climactic confrontation bethe downtrodden coal tween miners and their cruel masters. Sure, "How Green Was My Valley" comes to mind, and Emile Zola's "Germinal," and even Ernest Hemingway's Old Man and the Sea" (when Maggie's husband, Gillon Cameron, steals off to posted waters to eatch a 50-pound salmon for his starving family's Christmas dinner, only to lose most of the fish on the dangerous journey homeward). Sure. Mr. Crichton pulls out all the conventional stops there is the uneducated hero painfully learning to read Shakespeare, there is the long Dickensian deathbed scene and there is the trial in which the

But from the very first paragraphs, when the cold and the poverty to which Maggie Drum awakes becomes palpable on the page, you know that Mr. Crichton knows what he is up to, and that "The Camerons" is going to play the game of fiction by con-ventional rules, it is also going to make the most of those rules.

oppressed miners finally get their

day in court.

And thus it turns out precisely. Following the conventional rules, Maggie Drum gets out of bed, puts on the new tweed suit for which she has scrimped and saved and sets forth from the mining town of Pitmungo, Scotland, to catch herself a husband. Following the rules, the husband she snares is an aristocratic Scottish highlander, Gillon Forbes Cameron, whose family has fallen on hard times (although the scenes in which Maggie woos Gillon are distinctly unconventional in their warmth. humor and vivioness). Predictably, the couple return to Pitmimgo, and confidently we settle down to watch their rise in the world. certain that the combination of her toughness and his breeding will prove unbeatable.

But do they rise? Well, yes and no-and here is where Mr. Crichton begins to exploit the conventions and toy with our expectations. Maggie and Gillon heget seven unusual children. and that is good, we think. Gilion develops into the most skillful miner in town and begins to educate himself. and that good, we think. Maggie manages money shrewdly: she contrives ways for the family to earn money outside of the mines; she stashes a quarter of all the Camerons' income in that chest (or "kist") under the floor; she acquires the option to buy a mining-equipment business, which she hopes will set them all free

FROM the very first page of from the pits—and that is very

But somehow, the Camerons don't rise far enough to get free, Somehow, their very virtues seem work against them. children are all so ambitious and successful that they antagonize not only the rest of the mining community, but the managers of the mine as well. (For instance, in a particularly engrossing episode. Sam Cameron sets out to win all the track-and-field events in Pitmungo's annual holiday games; when he succeeds he is greeted with numb resentment) Gillon works so hard at improving himself that he is forced to recognize how the miners are exploited, which sets him on a collision course with management Maggie becomes so obsessed with filling her "kist" that she be-comes blind to what is happening around her. The family begins to fall apart. And because the literary conventions that Mr. Crichton is exploiting have led us readers to expect the best, we are all the more frustrated when events turn out for the worst.

What, or whom, are we to blame for the failure of these appealing people, the Camerons? Mr. Orienton knows exactly what and whom to blame—the mine owners and the system they have foisted on the workers. And so, switching from the conventions of the family chronicle to those of the proletarian novel, he devotes the second half of his novel to the inevitable accident that befalls Gillon: to Gillon's demand for compensation, which is of course callously refused; to the lockout that occurs when Gillon works up the courage to sue the cruel owner of the mine, Lord Fyffe: to the test of strength between the workers' solidarity and the owner's selfishness; to the dramatic face-to-face confrontation between Gillon and Lord Fyffe (a marvelous scene of little ironies and small turnabouts): and to the climax of the court

But again, Mr. Crichton toys with the conventions. And if we expect any of the predictable resuits, we are wrong. Instead of heroics, we get human weaknesses. Instead of that climactic trial, we get a little courtroom scene in which nobody wins anything much. And instead of a heavily symbolic conclusion—like the one with which Zola wound "Germinal"--we get a practical ending that settles the little questions satisfactorily and leaves? the big questions satisfactorily Certainly "The Camerons" may "

remind you of a thousand novels "" that have been written before. But as you are drawn into Mr. " " Crichton's vivid scenes, as you settle into his romantic and wholesomely sentimental proce. . and as you realize how well he his conventions you tebognize that "The Camerons" is a gem among a thousand rhinestones—an old-fashioned story that makes dead traditions come to life again, an old chestruit that seems warm and savory

Morton Can't Win Cowboy Fans

By William N. Wallace NEW YORK, Nov. 16 (NYT) --The recent appearance of bumper stickers in Dallas that say "We want Stau-back" must make Craig Morton feel grand. What more does a person have to do to be accepted? When Roger Staubach, the Cowboys' Super Bowl quarterback, chose to take on Marlin McKeever of the Rams in a collision last Aug. 12 and came out of it with a shoulder

separation, Morton took over. The Cowboys continued to win most of their games, in suite of a defense that may be wearing down and they seem certain to make the playoffs. But Morton cannot put a constituency together among the fans, the press or, one suspects, his own coaches and teammates. He seems cursed by events not of his own making.

The time of crisis nears. The Cowboys play the Washington Redskins on Dec. 9 to settle the National Conference's Eastern Division title. Because of their good records, both will likely qualify for the playoffs. Who will be the Cowboys' quarterback, Staubach or Morton?

The Pressure Game It will be hard for Coach Tom

Landry to lift Morton for a rusty Staubach, throwing Craig on the scrap heap once more. So far,

11 touchdowns and has had 14 interceptions. Not bad.

Yet Morton has buckled in pressure games, such as the 38-14 loss to Cleveland in 1969, due in part to problems with shoulder and elbow injuries that required surgery. He was the regular beginning in 1969 until Landry discarded him for Staubach midway through the 1971 season.

In their lone pressure game this season, the Cowboys lost to the Redskins, but Morton had less to do with that than Calvin Hill who dropped a touchdown pass, or the defense, which gave up a lead.

Morton Predictable

Enemy defenses would rather work against Morton than Staubach because the less mobile Craig never runs with the ball and Roger does, for first downs and sometimes touchdowns. In big games, any such extra quality is helpful as players, coaches and fans know. Hence the bumper

Morton, 29, is a quiet introverted type, reflecting few positive forces one associates with chainpionship quarterbacks. A bachelor whose activities became so complex he declared bankrupicy a few years ago, Morton would

Unwanted Competitor Rows Into Henley Regatta Time

LONDON, Nov. 16 (AP).—After more than 100 years of splendld isolation, Henley Royal Regatta—that bastion of tradition on the rowing scene is threatened by a streamlined, upto-the-minute competitor right next door.

Holme Pictrepont, Britain's first championship, multilane course, is open and beckoning the world's top competitors away from the magnificent tree-lined tranquillity of Henley into the

The first international regatta at Holme Plerreport will be held June 30 to July 1, the weekend before Henley's 1973 swing down the historic River Thames.

This is the period when, in previous years, crews from around the world have gathered in front of Henley's blue and white-striped hoat tents in preparation for the time-honored battles. Also scheduled for that weekend next year are stenley's proliminary races and the annual church service, all part of the build-up to the strawberries and cream and the sweat and tears. On top of all this, the draw, that nail-biting affair for crews and coaches in Henley's sudden-death head-to-head affair, takes place July 1.

Renley officials complained that the timing of Holme Pierrepont's international birth was unfortunate to say the least. They fear that top crews will be sidetracked from Henley to the brash newcomer located a mere 100 miles away in the

English Midlands. Holme Pierrepont, on the other hand, has valuable sponsorship to consider. The opening, of course, is timed to coincide with European tours by American crews. It wants to be a success from the outset because officials hope that it will soon be invited to stage Britain's first world rowing championships.

The artificial course, hewn attractively from the landscape near

Nottingham, with water diverted from the River Trent, is part

of a buge multisport complex. The British Amateur Rowing Association, which has several members who are also leading lights at Henley, voted 6-3 in favor of the Holme Pierrepont dates and then tried to calm the

An ARA spokesman said it would give "most serious consideration" for a change in dates in 1974 if it was found that Henley suffered adversely.

The main difficulty revolves around Europe's crowded rowing season. Top crews normally space their events about two weeks anart

Despite its out-of-step characteristics, including the one-mile 550-yard course-instead of the internationally accepted 2,000meter distance-Henley has survived many crises in the past. It may continue to do so.

"After all," said a Henley official, "Britain can now offer two top class international rowing events of distinctly different flavors, virtually for the price of one."

Rich Steeplechase in U.S. Moving Toward a Big Fall

-Saturday's third running of the sald. \$100,000 Colonial Cup internation-"Look what happened in Ensal steeplechase may well be the last. Ray Woolfe, director of the race, is tired of begging sponsors for subscriptions.

"I'm not going to subject myself to going around and drumming up money again," Woolfe said this week in his Springfield Course office. "If the cup doesn't go commercial next year, so far as I am concerned, it can become a nice little hunt meeting down here. And that would be a pity because the Colonial is the last hope for prestige in American steeplechasing.
"If a sport doesn't ofter some-

thing good to shoot for it's not going to seem worthwhile for very long. Jump races at night at Shenandosh Downs certainly aren't the answer."

Alfred Vand jumpers out of New York last year-except for a few hurdle events at Saratoga-because the fans preferred to bet on flat races. The through-the-field cult has literally, been relegated to the "sticks." If the Colonial Cup does not hold on there will be no chance to regroup.

"This is the make-or-break year," Woolfe admitted. "We went right to the last gap in getting up the money. I have, frankly, come close to doubletalking in getting sponsors (74 at \$1.000 aniece).

"It was important for us to have had a commercial sponsor this year. If we had, if we had had the money to say 'yes,' we might have attracted one. But by the time we had this third cup nalled together the commercial people had shot their advertising budgets for the year."

Colonial on Sale Woolfe has retained a New

York public relations firm to help sell the rights to the 1973 Colonial. "We damp near had one spon ser ready to pay for all the time this year," he said. "That would have put us over the top in a hurry. Instead, the cup committee is

virtually giving away its 1972 show to New York television, and to the New York Off-Track Betting Corp. It was either that or conduct the race for the provincial pleasure of 35,000 pincy South Carolinians. "Sponsorship is the answer, not just to our problem but to all

A Shocking Tale

By Russell Baker

Ted was silent for more than

two weeks. Then, on Aug. 15,

griddle, an electric mixing bowl,

an electric frying pan, an elec-

tric rotisserie-broiler, an electric

coffee pot and an electric tray

for keepling food warm on the

Martha became sullen and un-

communicative, On Labor Day,

she gave Ted an electric blanket.

but Ted, who had been expecting

something like this, was ready

He immediately retorted with

an electric can opener, an electric

food blender, an electric coffee

srinder, an electric hot-dog cook-

ing machine and a beautifu' elec-

tric cut-glass decanter imported

Martha stayed in her room,

refusing to see anyone, until Veterans Day, when she surprised

Ted with an electric radio-cas-

sette-recorder-player, an electric

typewriter, an electric shoe pol-isher and a bound volume of

advertisements by their local

electric company on the joys of

On Thanksgiving Day, while

carving the turkey with his elec-

tric knife, Ted Bertle was severely

shocked by the electric wishbone,

which had not been perfected

yet and still had bugs in it. He

was taken to the hospital and subjected to a long, humiliating

course of therapy before it was

safe for anyone to touch him

mitted to the hospital for the

birth of their first child, Ted was

not allowed to visit the maternity

ward because he still sizzled and

crackled so loudy that it woke the

other babies. For this reason, he

did not learn until Martha came

home that he had become the

father of an electric son, who

requires a change of fuses with

has learned about extension cords,

the child's electrician assures the

Bertles, there is no reason why

he cannot live a perfectly normal

life, provided he is careful not to

for her.

WASHINGTON.—The extraor-surprised Ted one evening with dinary events at the Bertle an electric toothbrush. household began innocently enough several years ago when Napoleon's birthda), Ted sur-prised Martha with an electric Martha Bertle gave her husband, Ted, an electric razor.

They can't even remember now whether it was a birthday or a Christmas present. In any event, Ted Bertle countered quickly 25 on the next ciftgiving occasion by giving Martha an electric carving

Baker

knife. It should be clear, of course, that before this exchange, which the Bertles now regard as the take-off point, they had already purchased, over the years, an electric stove, an electric refrigerator, an electric television set, three electric clocks, two electric "ir-conditioners, an electric freezer, an electric clothes-washingand-drying unit, three electric radios and a large number of electric lamps.

Also an electric stereo system. And an electric slide projector. And an electric toaster.

The electric train that Ted Bertle's parents had given him one boyhood Christmas was also in the house, as were Ted's electric saw and an electric sander and Martha's electric vacuum

It was not particularly surprising then that after Ted Bertle, on the occasion of their wedding anniversary, gave Martha an electric burglar alarm system for the house, electricians had to be called to deal with frequent power failures. Eventually they ran more lines into the house.

Thus strengthened for the long haul, the Bertles bought an electric dishwasher. On Father's Day, although Ted Bertle was not yet a father, Martha gave Ted an electric guitar, a sort of musical return for the electric organ Ted had given her on Mother's Day.

With the Pourth of July, Ted replied by giving Martha a pair of electric scissors and an electric sewing machine.

get rained upon.
The happy Ted and Martha For several days, they were have already given him an eleccontent simply to glare at each other, but in late July Martha tric teddy bear.

A Mayan Rescue Mission

By John Sibley

NEW YORK (NYT) -The artifacts of ancient Mays, hidden under dense jungle growth in Guatemals and Mexico's Yucatan area, have become the cause celebre of an international rescue mission.

An intensified drive to halt the pillaging of the ancient Central American civilization has been announced here by a small assemblage of archaeologists, international lawyers and art lovers at the Center for Inter-American Relations.

Plans for the campaign were based on a survey conducted by Karl E. Meyer, a journalist, who toured the area last February and March under a grant from the center.

The looting of archaeological sites has surged in recent years, Mr. Meyer reported Tuesday and-pronically-has become more profitable for the illicit operators as a result of new Mexican and Guatemalan laws to thwart them.

During the past 10 years, experts agreed, the Mayan rums have increasingly become the scenes of confrontations -sometimes gunfights among legitimate archaeologists, police, looters, and native guerrillas who are available for hire to

"In the name of art, we are now seeing men being ed," said Ian Graham, a British authority on Mayan Peabody Museum.

Mr. Meyer said, are Mayan stelae, huge stone slabs covered with hieroglyphics and sculpture in relief that once adorned Citing a typical situation the Meyer report said: "All

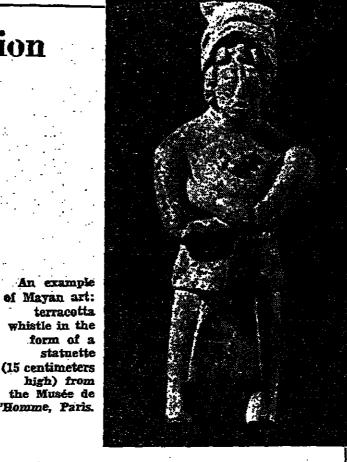

a stell for under \$1,000. Once at a port, the fragments can be shipped as commercial freight, or trucked up to Mexico City under a load of fruit. "Once in Mexico City or New York, the stolen monu-

museums and collectors," Both Mexico and Guatemala, the conferees noted, have

U.S. Law

signed into law a bill that explicitly forbids the import into the United States of Mayan stone carving, as well as all pre-Columbian "material of architectural or sculptural consequence," without the permission of the country of origin.

None of these legal moves, however, has proved entirely

form of a statuette (15 centimeters high) from the Musée de l'Homme, Paris.

William D. Rogers, a Washington attorney who heads the American Society of International Law and is former president of the Center for Inter-American Relations.

The first effort, Mr. Rogers said, will be to protect and preserve Mayan artifacts that still lie in the wilderness. Those most accessible to looters, he said, will be removed to museums. Those too heavy or too remote for easy removal, he added, will be protected by armed guards who can prevent would-be pillagers from sawing and sledge-hammering them into fragments that could be smuggled out of the country by private airplanes or boats.

The second phase of the campaign, Mr. Rogers said, will be a drive to dry up the black market for Mayan art in this country.

He noted that conversations are currently under way among a number of museum directors in this country as to the advisability of declaring a voluntary five-year moratorium on the purchase of pre-Columbian art.

Mr. Rogers also pointed to the fact that a Los Angeles art dealer, Clive Hollinshead, has been indicted and is awaiting trial in federal court on charges of receiving art objects illegally imported from Central America. Funding for the "Maya Rescue" program so far consists

of \$20,000 from the Tinker Foundation of New York, a relatively small amount when compared with the prices brought by some of the smuggled art treasures. But Ian Graham cited instances yesterday in which he

had been able to retrieve heavy Mayan artifacts with trucks and native labor for \$200 or \$300.

PEOPLE:

Britain's Princess Anne, 22, already recognized as a horsewom

an, is getting a reputation among some policemen as a car

jockey. Police officials said yes-

terday they may prosecute Anna

on speeding charges, It would be the first prosecution of a mem-

ber of the present royal family.

UPI noted. The police officials

seld that Anne was stopped on

two separate occasions earlier

this month for exceeding the 70-

miles-an-hour limit on Britain's

motorways. Once she was report-

edly going just under 90. On both

occasions she was at the wheel

of an expensive Reliant Scimitar

sports car, similar to the one

given to her by her parents for

her 21st birthday. It was lent to

her by a garage while her own

car was being repaired. "A report

has been submitted in the normal

way," a police spokesman said.

"She should be treated like any

other motorist involved in speed-

ing offenses." The spokesman

said the final decision on prosecu-

tion rests with the chief constable

of the area northwest of London

where she was stonned A Buck-

ingham Palace spokesman ack-

nowledged that the princess "was stopped twice in the last few

weeks by the police, but this is

the first I have heard that the

police are considering pros-ecuting."

Two more of Queen Elizabeth's

relatives were also in trouble with

the law yesterday. Her uncle, Earl Mountbatten of Burma, waz

fined for watering the milk down

on his farm. Her cousin, the Earl of Lichfield, had his driving

license suspended for using his

Rolls after drinking. Mount-batten's case was heard by mag-

istrates at Romsey in Hampshire

where the 71-year-old former ad-

miral farms with a nephew. He

was not in court and the farm is
